17) Intentional Misrepresentation
18) Negligent Misrepresentation
19) Fraud
20) Violations of California's Unfair
Competition Law (Cal. Bus. & Prof.
Code, §§ 17200 *et seq.*)

DEMAND FOR JURY TRIAL

COMPLAINT

Plaintiff Thomas K. Litton hereby brings this action against the above-captioned Defendants (hereinafter collectively referred to as "Defendants"), Roblox Corporation, Epic Games, Inc., Microsoft Corporation, Mojang AB, and DOES 1-50, to recover damages, pursuant to and under the laws of the State of California, arising from the severe injuries sustained because of Thomas K. Litton's use of and addiction caused by Defendants' respective video game Products. In support thereof, Plaintiff alleges and states:

INTRODUCTION

1. Many modern video games are fun and engaging adventures that allow individuals to immerse themselves in the world of games. This litigation is not a war on fun. Nor does it seek to curtail the creation and enjoyment of entertaining video games. Rather, this litigation seeks to hold each Defendant accountable for failing to warn and failing to include available safeguards against the known risks to minors associated with excessive use of their respective video game products and choosing instead to implement programming that exacerbated these risks to increase their profits.

2. Each Defendant is aware that the more time an individual spends playing their respective games and on their platforms, the higher the likelihood that said individuals will make in-game purchases, thereby increasing each Defendant's revenue.

3. Each Defendant is also aware that for more than four decades, scientists have known about and studied video game addiction.¹ Furthermore, each Defendant is aware that for nearly two decades, science has shown that prolonged use of video games by minors can result in impacts on brain function, cognitive decline, and physical and emotional deficits.

4. Despite being fully aware of these risks, Defendants marketed their respective games, Roblox, Fortnite, and Minecraft, and Xbox video game platform², (collectively “Products”), to minors without implementing simple safety features, such as adequate parental controls, warnings, or opt-in limits on the time minors can spend in-game.

5. Instead, each Defendant chose to add features to their respective Products that they knew would be addictive to minors in order to maximize time spent in their respective games and on their platform, thus improving the odds of minors making in-game purchases, and thereby increasing each Defendant’s profits. Rather than taking necessary steps to mitigate the known risks associated with prolonged exposure of minors to video games, each Defendant intensified the problem by causing and profiting from youth addiction.³

6. Defendants’ strategies have been extremely lucrative. As a result of each Defendant’s inclusion of addictive features in their respective Products, they have collectively generated billions of dollars, while causing and/or contributing to a public health crisis for minors suffering from addiction to and disordered use of video games.

¹ MD Griffiths; Halley de Oliveira Miguel Pontes, *A History and Overview of Video Game Addiction*, The Oxford Handbook of Digital Technologies and Mental Health (Oct. 8, 2020) <https://doi.org/10.1093/oxfordhb/9780190218058.013.2>.

² Hereinafter, “Xbox platform” collectively refers to all Xbox consoles (including Xbox 360, Xbox One, Xbox One S, and Xbox One X) and Xbox online game platforms (including the Xbox Network, Xbox Game Pass, Xbox Store, and Xbox Cloud Gaming).

³ Addiction, as defined in the seminal article *Addictive behaviors: Etiology and Treatment*, published by the American Psychological Association in its 1988 *Annual Review of Psychology*, is:

“a repetitive habit pattern that increases the risk of disease and/or associated personal and social problems. Addictive behaviors are often experienced subjectively as ‘loss of control’ – the behavior contrives to occur despite volitional attempts to abstain or moderate use. These habit patterns are typically characterized by immediate gratification (short term reward), often coupled with delayed deleterious effects (long term costs). Attempts to change an addictive behavior (via treatment or self-initiation) are typically marked with high relapse rate.”

1 7. While there are countless video games on the market, many with similar game design
2 and warning defects described herein, Defendants and their respective games Roblox, Fortnite, and
3 Minecraft have unique impacts on minors. As explained below, each Defendant's marketing
4 strategies specifically target youth. Accordingly, Defendants' games – Roblox, Fortnite, and
5 Minecraft – are often among the first online video games children play and the catalyst to an
6 addiction cycle and disordered relationship with video games.

7 8. Defendant Microsoft's Xbox video game platform is often where these games are
8 played. As described herein, Defendant Microsoft designed its Xbox platform with game-like
9 features that caused and further exacerbated addiction and disordered relationships with video
10 games.

11 9. As set forth below, because of Defendants' respective marketing efforts, Roblox,
12 Fortnite, and Minecraft were among the first online video games played by Plaintiff Thomas K.
13 Litton, Plaintiff Thomas K. Litton played these games on Microsoft's Xbox platform. As each
14 Defendant expected and intended from their decision to add addictive and manipulative
15 programming to their Products instead of safety features, Thomas K. Litton developed a disordered
16 relationship with and became addicted to video games as a result of playing Roblox, Fortnite, and
17 Minecraft. As a result, Thomas K. Litton suffers from severe physical, emotional, and economic
18 injuries, including diminished social interactions, lack of interest in other hobbies, and withdrawal
19 symptoms such as rage, anger, and physical outbursts. Through this lawsuit, Thomas K. Litton
20 seeks to hold each Defendant accountable for their respective decisions to place profits over safety,
21 which directly and proximately resulted in Thomas K. Litton's significant harm.

22 10. The true names and capacities of the Defendants, DOES 1-50, are unknown to
23 Plaintiffs at the time of filing this Complaint and Plaintiffs, therefore, sue said Defendants by
24 fictitious names and will ask leave of court to amend this Complaint to show their true names or
25 capacities when the same have been determined. Plaintiffs are informed and believe and thereon
26 allege that each of these fictitiously named Defendants are responsible in some manner for the
27 occurrences alleged herein, and that Plaintiff's injuries and damages as alleged and set forth herein
28 were proximately caused by such fictitiously named Defendants.

PARTIES

I. Plaintiff Thomas K. Litton

11. Plaintiff Thomas K. Litton, , is, and at all times relevant to this action was, a citizen and resident of the State of Louisiana with a principal place of residence located in Shreveport, Louisiana. . Thomas K. Litton was 17 years old at the time of filing of the initial Complaint herein; he is now 18 years old.

12. Thomas K. Litton began playing video games and using Defendants' Products at approximately 10 years old. Since that time, Thomas K. Litton has used and/or continues to use Defendants' Products at an increasing, uncontrollable, compulsive, and/or addictive pace. Thomas K. Litton has been injured and damaged, and continues to be injured and damaged, as a result of Thomas K. Litton's use of, and addiction caused by Thomas K. Litton's use of, Defendants' defective Products.

II. Defendant Roblox Corporation

13. Defendant Roblox Corporation ("Roblox Corp.") is a Delaware corporation with its principal place of business at 910 Park Pl., San Mateo, California 94403.

14. Roblox Corp. is a video game developer and publisher that, at all times material hereto, designed, developed, tested, patented, assembled, manufactured, published, packaged, labeled, prepared, distributed, marketed, supplied, and/or sold its video game and platform, Roblox, either directly or indirectly, to members of the general public from California to customers within the State of Louisiana, including to Plaintiff Thomas K. Litton.

III. Defendant Epic Games, Inc.

15. Defendant Epic Games, Inc. ("Epic Games") is a Maryland corporation with its principal place of business at 620 Crossroads Blvd, Cary, North Carolina 27518.

16. Epic Games is a video game developer and publisher that, at all times material hereto, designed, developed, tested, patented, assembled, manufactured, published, packaged, labeled, prepared, distributed, marketed, supplied, and/or sold the Fortnite video game series and platform, either directly or indirectly, to members of the general public within the State of L California, and to Plaintiff Thomas K. Litton. Defendant Epic purposely directed its activities toward the State of

1 California, and expressly aimed its marketing, player matching, and other activities toward this
2 forum state, which has resulted in foreseeable harm to users. Plaintiff's claims are related to and
3 arise from Epic's forum related contacts. Defendant Epic has actively availed itself of the benefits
4 of this forum, both through its marketing of products and the matching of players outside of the
5 State of California to players in this forum.

6 **IV. Defendant Microsoft Corporation**

7 17. Defendant Microsoft Corporation ("Microsoft") is a Washington corporation with its
8 principal place of business at One Microsoft Way, Redmond, Washington 98052.

9 18. Microsoft is a video game developer and publisher that, at all times material hereto,
10 designed, developed, tested, patented, assembled, manufactured, published, packaged, labeled,
11 prepared, distributed, marketed, supplied, and/or sold the Minecraft video game series and platform,
12 either directly or indirectly, to members of the general public within the State of California, and to,
13 Plaintiff Thomas K. Litton.

14 19. At all times material hereto, Microsoft designed, developed, tested, patented,
15 assembled, manufactured, packaged, labeled, prepared, distributed, marketed, supplied, and/or sold
16 the Xbox Platform – on which Roblox, Fortnite, and Minecraft could be played – to members of the
17 general public within the State of California, and to Plaintiff Thomas K. Litton. Defendant Microsoft
18 purposely directed its activities toward the State of California, and expressly aimed its marketing,
19 player matching, and other activities toward this forum state, which has resulted in foreseeable harm
20 to users. Plaintiff's claims are related to and arise from Microsoft's forum- related contacts.

21 **V. Defendant Mojang AB**

22 20. Defendant Mojang AB ("Mojang") is a Swedish company with its principal place of
23 business at Söder Mälarstrand 43, 118 25 Stockholm, Sweden.

24 21. Mojang is a video game developer and publisher that, at all times material hereto,
25 designed, developed, tested, patented, assembled, manufactured, published, packaged, labeled,
26 prepared, distributed, marketed, supplied, and/or sold the Minecraft video game series and platform,
27 either directly or indirectly, to members of the general public within the State of California,
28 including to Plaintiff Thomas K. Litton.

the State of California by marketing video game Products and transacting business in the State of California,. Next, Epic Games’s registered agent for service of process is in California at CT Corporation System - 330 N Brand Blvd., Glendale, California, 91203. Microsoft also has a registered agent for service of process in California at Corporation CSC – 2710 Gateway Oaks Drive, Sacramento, California 95833. Further, the controversy reflected in this action is directly affiliated with, related to, and arises from each Defendant’s contacts with the State of California. a, The Plaintiff’s claims, and the Plaintiff’s damages arise out of Microsoft and Epic’s forum related activities. Likewise, the Plaintiff’s claims and damages are related to the forum-directed activities of Epic and Microsoft. The Plaintiff, on information and belief, played the Defendants’ games with California residents as part of the interactive matchmaking process featured in the design of the Defendants’ products. Venue is proper in this Court because, among other things: (a) each Defendant directed its activities at residents in this District; (b) each Defendant conducted substantial business in this District; (c) a substantial part of the counts giving rise to this action occurred in this District; and Plaintiff’s claims are related to these Defendants’ forum-directed activities.

GENERAL FACTUAL ALLEGATIONS

29. In 2023, 65% of Americans of all ages played video games every week.⁴ In 2024, experts reported that roughly 85% of teenagers say they play video games, with 97% of boys and 73% of girls reporting video game usage.⁵ Further, more than 90% of children older than two years old play video games, and “[c]hildren 8 to 17 years of age spend an average of 1.5 to 2 hours daily playing video games.”⁶ This research dramatically emphasizes the idea that video game usage has become fundamental in the life of an American child.

⁵ Jeffrey Gottfried & Olivia Sidoti, *Teens and Video Games Today*, Pew Res. (May 9, 2024), <https://www.pewresearch.org/internet/2024/05/09/teens-and-video-games-today/>.

⁶ Daniel Alanko, *The Health Effects of Video Games in Children and Adolescents*, *Pediatr. Rev.* (Jan. 1, 2023).

I. Extensive Video Game Usage Damages Adolescent Brains

30. For almost two decades, research on the interaction between video game usage and the adolescent brain has shown that extensive usage has a severe impact on the adolescent brain, including loss of grey matter, which leads to severe physical and mental effects on the child. Many of these effects are indicators or consequences of Internet Gaming Disorder (“IGD”), which is the addiction to video gaming.

31. One of the ways that the impact of video game usage is studied is research about the role dopamine plays in the brain during gameplay.

32. Video games can and do cause an intense dopamine release in the user that is similar in magnitude to that experienced by substance abuse or gambling. Dopamine is a neurotransmitter made in the brain that acts as a chemical messenger that communicates messages between nerve cells in the brain, as well as between the brain and the body. Dopamine serves as the brain’s all-important “reward center” and, in addition, plays a critical role in several body functions including attention, mood, pleasurable reward and motivation, sleep, learning, and movement. The release of dopamine causes demonstrable physical, mental, and emotional responses in the human brain and body. This is especially true in minors, and particularly neurodivergent minors, whose brains are still developing. Increased frequency of dopamine releases can lead to withdrawal symptoms, including anger, irritability, or physical outbursts when the game is made unavailable.

33. The repetitive release of dopamine creates, reinforces, and strengthens a dysregulated or dopaminergic neural pathway that propels the user to hyperfocus on using the video games more and more, first at an increasing rate and then with compulsive desire until the impulse to use the video games develops into a disordered use or addiction.

34. Those dysregulated neural pathways trigger addictive, compulsive, and impulsive behaviors outside of the gaming world consisting of life-altering impulsivity and inhibitory control behaviors that can and do cause a myriad of catastrophic physical, mental, and emotional disorders, symptoms, and injuries, including other addictions, significant withdrawal symptoms, maldevelopment of the brain’s frontal lobe, dissociative behaviors, social isolation, damage and/or negative consequences to cognitive processes, attention disorders, severe depression, morbid

1 obesity, mal and/or undernutrition, and other harmful effects, all to the severe detriment and damage
2 to the minor, and to the severe emotional detriment and pecuniary or economic damage to their
3 families and caretakers.

4 35. Additional research on the impact of video games reports physical changes to the brain
5 and brain matter as a result of gameplay.

6 36. Research has shown that prolonged use of video games damages the prefrontal cortex
7 of the user, causing a loss of grey matter, lower cognitive function, and an inability to regulate
8 impulse control. Research has also concluded that such use of video games may lead to negative
9 effects like stress, aggressive behavior, verbal memory deficiency, depression, lowered cognitive
10 abilities, sleeping disorders, anxiety, and behavioral addiction disorders.

11 37. Clinical evidence has shown that users addicted to online games experience
12 biopsychological symptoms and complications, including symptoms traditionally associated with
13 substance abuse and addiction, such as hangovers, changes in mood, ability to adapt, withdrawal,
14 conflict, and recurrence symptoms.

15 38. Empirical studies indicate that gaming disorders are associated with detrimental
16 health-related outcomes.

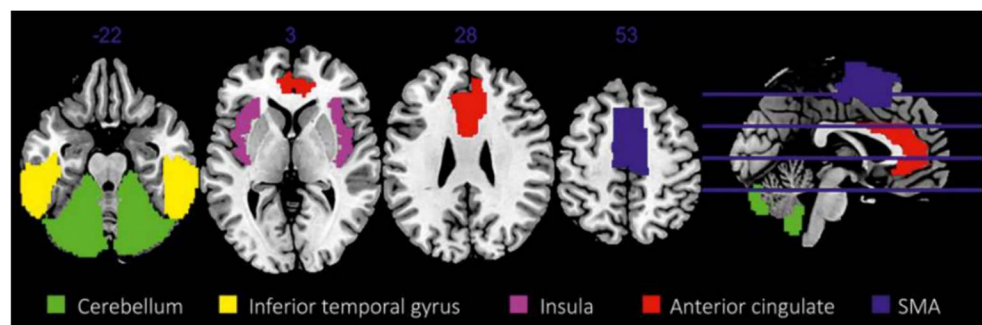

17 39. Brain imaging studies have shown that excessive use of video games negatively
18 affects the brain regions responsible for reward, impulse control, and sensory-motor coordination.

19 40. Other studies have shown that disordered and/or excessive use of video games leads
20 to negative consequences on cognitive processes, including multi-second time perception,
21 inhibition, and decision-making.

22 41. During adolescence, the prefrontal cortex—the locus of judgment, decision-making,
23 and impulse control—is still developing and undergoing major reorganization. This region of the
24 brain does not reach maximum capacity until the age of 25 to 30. The executive control center of
25 the prefrontal cortex is essential to one's ability to healthfully weigh risks and rewards and for
26 pausing the pursuit of immediate rewards in favor of more adaptive longer-term goals. The lack of
27 full development of the prefrontal cortex is arguably why young people are more likely to engage
28 in hours of use while ignoring basic needs like food, sleep, and hygiene. Without mature frontal

lobes, minors are less able to weigh potential negative consequences and curb potentially harmful behavior like excessive use of video games, which further impacts frontal lobe development.

42. Brain imaging studies related to IGD have shown structural changes in the brain, particularly a reduction in white-matter density (consisting mostly of cells and axons that transmit signals from the cerebellum to other brain regions) and grey-matter volume (associated with emotions, perception, memory, and motor control). Specifically, studies showed several regions of the brain demonstrated reduction in grey-matter volume in gaming disorder participants, as depicted here:⁷

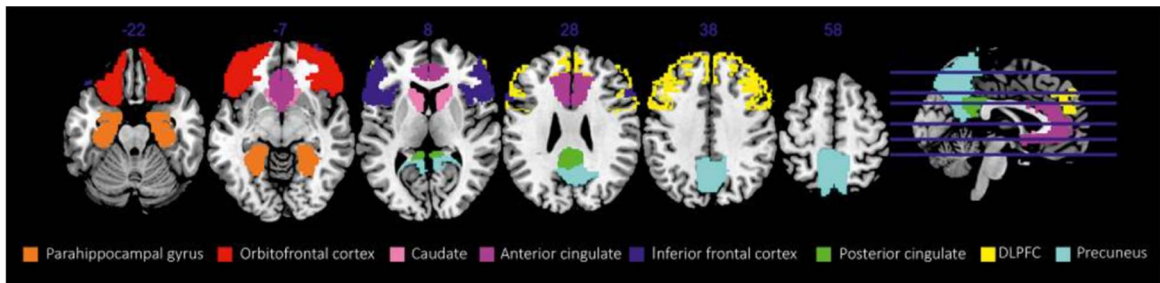

43. Brain activation studies have shown that the use of video games causes changes in the reward and impulse control regions of the brain, and that engaging with video games activates regions of the brain in a manner similar to the way the brain is activated in response to cue-exposure to drugs (whereby addicts are exposed to relevant drug cues to extinguish conditioned responses).

44. Additional brain activation studies have shown that individuals with gaming disorders have impaired inhibitions, and that video game cues activate craving, attention, and executive function areas of the brain. Those cognitive, sensory-motor, and emotional processes may be associated with long-term changes to the brain because of prolonged use of video games. Regions that showed activation in response to video game cues in gaming disorder participants in more than two studies are depicted in the following image:⁸

⁷ Livny, Weinstein, and Weizman, *New Developments in Brain Research of Internet and Gaming Disorder*, 75 *Neurosci. Biobehav. Rev.* 314 (Apr. 2017).

⁸ Aviv Weinstein et al., *Neurobiological Mechanisms Underlying Internet Gaming Disorder*, 22(2) *DIALOGUES CLIN. NEUROSCI.* (2020).

45. Structural studies of the brain have shown alterations in the volume of the ventral striatum (a critical component of motor and reward systems in the brain) are possible because of changes in reward regions of the brain. One comparison study of young adults with a mean age of 24 revealed that individuals who engage in excessive use of video games tend to have lower cognitive function, particularly in areas of verbal ability and working memory.

46. Research has shown that a neurodivergent minor with a diagnosis of Attention-Deficit Hyperactivity Disorder (“ADHD”) or Autism Spectrum Disorder is at a higher risk of developing video game disorder or addiction, which can worsen one’s ability to control impulsivity and result in brain damage.⁹ Research has shown that while use of video games may foster creativity in some minors, such potential benefits are outweighed by the risk of developing addiction or disordered use of video gaming products, which typically develops swiftly in minors and neurodivergent individuals. This is particularly true when the video games incorporate addictive and manipulative tactics, as well as other problematic psychological programming.

II. Gaming Addiction Is a Recognized and Diagnosable Condition

47. Addiction to and disordered use of video games and internet gaming is a recognized, diagnosable mental disorder and form of behavioral addiction codified by the American Psychiatric Association’s 2013 Diagnostic and Statistical Manual of Mental Disorders (DSM-5).¹⁰ The diagnostic symptoms of internet gaming disorder currently set forth in DSM-5 include: (1) Preoccupation with playing and/or using video games; (2) Withdrawal symptoms (sadness, anxiety, irritability, and/or other unpleasant symptoms) when access to play and/or use is removed,

⁹ Micah O. Mazurek & Christopher R. Engelhardt, *Video Game Use in Boys with Autism Spectrum Disorder, ADHD, or Typical Development*, 132 Am. Acad. of Ped. J.L. 2 (2013).

¹⁰ It is also recognized in the recently released Diagnostic and Statistical Manual of Mental Disorders, Text Revision (DSM-5-TR).

precluded, or reduced; (3) Tolerance - the need to spend more time playing and/or using video games to satisfy the urge and desire to do so; (4) Loss of Control or the inability to reduce video game playing and usage time and/or unsuccessful attempts to quit gaming; (5) Giving up other activities or loss of interest in previously enjoyed activities due to compulsion to play video games; (6) Continuing to play and use video games despite negative or problematic consequences; (7) Deceiving family members or others about the amount of time spent playing and/or using video games; (8) Using video games to “escape” or relieve negative moods, such as guilt or hopelessness; and (9) Jeopardized school or work performance or relationships due to playing and/or using video games.

48. Nationally recognized institutions such as the Cleveland Clinic and the National Center for Biotechnology Information (NCBI) also recognize video game addiction and categorize the addiction as falling under the general category of IGDs.¹¹

49. As of 2022, “Gaming disorder”—disordered use of and/or play with video games—is a recognized mental health disorder by the World Health Organization and International Statistical Classification of Diseases and Related Health Problems. “Gaming disorder” is included within the subcategory “ICD-11” entitled “Disorders due to substance use or addictive behaviors.”¹² “Gaming disorder” is defined in the 11th revision of the International Classification of Diseases as a pattern of persistent or recurrent gaming behavior, specifically “digital gaming” or “video-gaming,” which may be online or offline, manifested by: impaired control over gaming (e.g., onset, frequency, intensity, duration, termination, context); increasing priority given to gaming to the extent that gaming takes precedence over other life interests and daily activities; and continuation or escalation of gaming despite the occurrence of negative consequences.

III. Historical Development and Modernization of Video Games

50. The term “video game” is defined by California Civil Code §§ 1746-1746.5 as “any electronic amusement device that utilizes a computer, microprocessor, or similar electronic

¹¹ Shabina Mohammad, Raghad A Jan, & Saba L Alsaedi, *Symptoms, Mechanisms, and Treatments of Video Game Addiction*, Cureus (Mar. 31, 2023).

¹² Other disorders found in that subcategory include alcoholism and gambling addiction.

1 circuitry and its own monitor, or is designed to be used with a television set or a computer monitor,
2 that interacts with the user of the device.”

3 51. Video games were first developed in or around the 1950s.

4 52. Initially, games were only available to be played by the general public in arcades.
5 Beginning in the 1970s, however, the first at-home video game devices (“consoles”) appeared on
6 the market.

7 53. By the late 1990s and early 2000s, there were multiple at-home video game consoles,
8 such as Xbox, PlayStation, and Nintendo’s Wii, making video games easily accessible to most users
9 from the comfort of their living room. Over the next ten years, video games moved to mobile
10 devices and tablets, once again increasing accessibility to gameplay.

11 54. Many video games – including Roblox, Fortnite, and Minecraft – can now be played
12 on multiple different consoles, mobile devices, and tablets.

13 55. Moreover, video games can be delivered to these consoles, mobile devices, and tablets
14 in several diverse ways, such as physical discs, digital downloads, online gaming networks, and
15 cloud gaming services.

16 56. In 2024, there were 1.17 billion gamers online, and global gaming revenues are at least
17 \$176.06 billion.¹³

18 57. As the sophistication of gaming devices and game delivery methods has increased, so
19 too has the sophistication of the design of games themselves.

20 58. Unlike their predecessors, many modern-day games are enormous in scale, providing
21 countless hours of non-repetitive, unique gameplay that allows players to become immersed in the
22 world of the game.

23 59. The ways in which game developers monetize their games have also changed over
24 time. In the past, game developers earned revenue primarily through the one-time sale of their
25 games. Although some game developers still follow this model, others – including Defendants –
26

27
28 ¹³ Jasmine Katatikarn, *Online Gaming Statistics and Facts: The Definitive Guide (2024)*, Acad. of
Animated Art (Jan. 16, 2024), <https://academyofanimatedart.com/gaming-statistics/>.

1 allow their games to be downloaded for no or minimal cost and generate revenue through purchases
2 made within the game.

3 60. In-game purchases can include, but are not limited to, cosmetic customizations for the
4 player's character (*e.g.*, hats, uniforms, hair styles), "boosters" that help their character perform
5 better or progress faster within the game, and "season passes" that allow players to access exclusive
6 in-game content.

7 61. Many of these in-game purchases are relatively low cost, leading to them being termed
8 "microtransactions."

9 62. In-game items available for purchase are often heavily advertised to players through
10 means such as in-game pop-up advertisements during gameplay, loading screens while users wait
11 for gameplay to start, and in-game stores.

12 63. Many games also offer game-branded products such as toys, energy drinks, apparel,
13 bedding, home goods, board games, and more.

14 64. For game developers that offer their games at no or low cost, such as Roblox, Fortnite,
15 and Minecraft, microtransactions are vital for increasing profits. Indeed, the design and marketing
16 strategy associated with such games is rooted, in part, in the theory that the revenue from the on-
17 going microtransaction system will outweigh the revenue from a one-time-purchase game. That is
18 because microtransaction spending can easily add up to hundreds, or even thousands, of dollars
19 from an individual user.

20 65. Accordingly, modern gaming companies are enlisting PhD behavioral psychologists
21 and using research to implement programming into their games that will addict players with a goal
22 of increasing the amount of time spent in game, at times providing features that encourage the
23 player to reach a flow state of continuous gameplay, thereby prolonging their exposure to in-game
24 marketing for in-game purchases in order to improve the odds players will engage with
25 microtransactions that generate profits for the game developer.

26 ///

27 ///

IV. Psychological Techniques and Programming Choices Game Developers Use to Create Addiction, Drive Microtransactions, and Increase Profits

A. Operant Conditioning

66. Modern game developers, including Defendants, employ(ed) and/or consult(ed) child development experts and/or psychologists to assist with the design and development of their games and/or gaming platforms, and to analyze the effects of game design on user behavior.

67. Upon information and belief, modern game developers, including Defendants, knew that minors were engaging with their Products and utilized their child development experts and/or psychologists to design their games to attract and addict minors to their Products.

68. Upon information and belief, the analyses performed by each Defendant's behavioral experts and/or psychologists revealed that when video games that are programmed to incorporate "operant conditioning" that targets users' dopamine receptors, the operant conditioning triggers users' desire to hyperfocus on using and overusing the Products.

69. "Operant conditioning" is a form of behavioral manipulation that uses rewards and punishments to influence behavior. Through operant conditioning, rewarded behavior is likely to occur more frequently, while the frequency of punished behavior decreases.

70. In the context of video games and gaming platforms, video game developers including Defendants, relied upon these psychological analyses to program their games and platforms to employ operant conditioning in order to addict players and manipulate them into making profitable decisions for the game developers, such as spending more time playing their respective games and engaging in microtransactions.

B. Development and Use of Patented Programming

71. In addition to relying on their own studies to make programming decisions, game developers, including Defendants, helped develop, licensed, and otherwise utilized patented programming algorithms in their games and gaming platforms that were intended to addict players, increase time spent in-game, and drive microtransactions. By way of example:

- a. U.S. Patent No. 20160005270-A1, is a "matchmaking" patent that uses historical player data and analytics to create a system for driving microtransactions in a

1 multi-player game. This “matchmaking” patent is used in Products, like
2 Defendants’ at issue here, and can be summarized as a “system and method ...
3 that drives microtransactions in multiplayer video games. The system may
4 include a “microtransaction arrange match[] to influence game-related purchases.
5 For instance, the system may match a more expert/marquee player with a junior
6 player to encourage the junior player to make game-related purchases of items
7 possessed/used by the marquee player. A junior player may wish to emulate the
8 marquee player by obtaining weapons or other items used by the marquee player.”
9 The system for driving microtransactions is comprised of a host computer having
10 one or more physical processors programmed with computer program
11 instructions that, when executed by the one or more physical processors, cause
12 the host computer to: identify an in-game item that is relevant to a first player,
13 but not yet possessed by the first player for gameplay in a multi-player game;
14 identify a second player that possesses the in-game item; and match the first
15 player and the second player to play in a gameplay session to encourage purchase
16 of the in- game item by the first player, wherein the matching is based on: (i) the
17 relevance of the in-game item to the first player, and (ii) the possession of the in-
18 game item by the second player. This system is further programmed to determine
19 that the first player has purchased the in-game item in relation to the gameplay
20 session; determine a subsequent gameplay session that caters to use of the in-
21 game item; and match the first player to play in the subsequent gameplay session
22 to encourage future purchases.

23 b. U.S. Patent No. 9623335-B1 utilizes a “user spend parameter value” to
24 “determine which users should be provided with access to an exclusive virtual
25 section of the online game,” such as a virtual shop “present[ing] high-end, or
26 expensive virtual items.” This prevents the game from losing the opportunity “to
27 extract additional value from users inclined to spend money.”

28 c. U.S. Patent No. 9138639-B1 creates a dynamic pricing system which modifies

1 the “pricing of in-game virtual items associated with [players’] experience and
2 their progress in the game.” In this way, “while all players may receive a message
3 for a particular item, the cost for each player may be more or less than other
4 players based on the individual’s in-game statistics.”

5 d. U.S. Patent No. 9795886-B1 allows new users to purchase in-game support more
6 cheaply than experienced users. Particularly, the system determines “prices for a
7 protection extension in an online game” based on “the user’s power and/or
8 strength in a game.” This allows a less experienced player to “build up their
9 strength in a game, thus promoting further player engagement.”

10 e. U.S. Patent No. 9403093-B2 is a “dynamic” pricing patent that encourages users
11 to make purchases on multiple game devices or platforms by providing incentives
12 for such “cross platform game play.” In particular, “[t]he system may monitor the
13 player’s performance on a particular console and provide incentives to
14 accomplish tasks through game play on a different platform than the player is
15 currently operating to play the game.”

16 f. U.S. Patent No. 9626475-B1 creates an exclusive, time-limited, event-based
17 currency. During such an event, players may acquire a second type of virtual
18 currency in addition to other forms of virtual currency. The event-based currency
19 may be purchased with real-world money, and after the event, the event-based
20 currency may become unusable by or unavailable to the users.

21 g. U.S. Patent No. 9666026-B1 provides offers that “decrease in value based on
22 previous acceptances of the offers” in order to create a sense of urgency in relation
23 to the virtual items. Offers provided “may include a first offer having a first value
24 that progressively decreases based on an amount of users that have previously
25 accepted the first offer in order to incentivize early acceptance of the first offer.”

26 h. U.S. Patent No. 9808708-B1 adjusts “virtual item bundles made available to users
27 of an online game based on user gameplay information.” This allows the game to
28 increase the price of an item bundle for a user with less cost sensitivity associated

1 with items that the user enjoys.

2 72. Upon information and belief, many game developers, including each Defendant,
3 license one or more of the above technology patents, and/or other patents similar thereto, and
4 incorporate said technology into their respective Products with the intention of creating addiction
5 and profits.

6 **C. Operant Conditioning, Patented Technology, and Game Design Choices Increase**
7 **Time Spent In-Game and Revenue Generated by Microtransactions**

8 73. Using operant conditioning and patented technology, video game developers,
9 including Defendants, use algorithms to analyze the behavior of the user and customize their
10 experience, or guide the user to reach a flow state while playing, to maximize the time spent in-
11 game, during which the user is bombarded with solicitations to purchase additional in-game
12 downloadable game content.

13 74. In so doing, video game developers, including Defendants, exploit an information
14 asymmetry between themselves and the user. This allows game developers, including the
15 Defendants, to use their knowledge of the user's skill, game-related preferences, available funds,
16 and/or playing and spending habits to present in-game downloads and purchase offers that are
17 predetermined to maximize a user's expenditure of real money.

18 75. For example, in some instances, video game developers, including Defendants,
19 increase the difficulty of the game as the player's skill increases, thereby increasing the amount of
20 time it takes for the player to achieve repeated success. During the extra time it now takes for the
21 player to achieve success, the player is exposed to repetitive advertisements for desirable in-game
22 items that can be obtained through points earned over time through continued and prolonged
23 gameplay or instantaneously using in-game or real-world currency.

24 76. Likewise, game developers, including Defendants, may offer "season passes" in which
25 players can pay real-world money to obtain access to exclusive items that are available to be
26 purchased for a limited time through points earned during game play. Game developers incentivize
27 players that have purchased "season passes" to engage in prolonged game sessions during the
28 "season" to earn sufficient points to collect each exclusive item. Once again, however, by design

1 game difficulty is dynamic, resulting in players needing to play longer to obtain the results they
2 desire, all while being exposed to advertisements for additional in-game products.

3 77. Critical to each Defendant's revenue, such continued features with little to no
4 restriction on the amount of spending in the payment interface also makes it easy for minor users
5 to fail to understand the value of the actual money being spent, which allows for more easeful and
6 continuous spending of real money.

7 78. These and other features—all of which the Defendants knowingly incorporate into the
8 design aspects of their respective Products—use psychological mechanisms, behavioral
9 psychology, and neuroscience to encourage repeated use and increased spending by users
10 (especially minors who are vulnerable to these tactics) and which serve to deepen their disordered
11 or addicted use.

12 **V. Addictive Game Design Features Cause Significant Harm to Minors**

13 79. The human population most vulnerable to the combination of game developers'
14 microtransaction methodology and addictive operant conditioning design features are minors;
15 minors who are neurodivergent are even more susceptible to becoming addicted. Video game
16 developers, including Defendants, knew this, but nonetheless purposefully designed their games
17 and platforms to exploit that vulnerable population, causing injury and detriment, including to
18 Plaintiff Thomas K. Litton. Doing so has yielded the intended results: video game developers,
19 including Defendants, have earned extraordinary financial revenue from this group of users as a
20 result of placing their addictive Products that are targeted to minors into the stream of commerce.

21 80. Each Defendant knew or was aware, or should have known and should have been
22 aware, that their respective Products were dangerous and harmful to users, particularly minors,
23 when used as intended and in a reasonably foreseeable manner. In fact, each Defendant intentionally
24 caused and designed their respective Products to most effectively cause users with developing
25 brains to become addicted or disordered in their desire to use the Products. To that end, upon
26 information and belief, each Defendant employed behavioral psychologists and/or neuroscientists
27 to develop Products that incorporated design features premised upon psychological tactics
28 engineered to keep users engaged in using the Products for longer and longer periods of time.

1 81. The microtransactions and other technologies, designs, features, mechanisms,
2 algorithms, artificial systems, programs, and other processes each Defendant incorporated into their
3 Products were implemented in a manner such that users (and, when users are minors, their
4 caretakers) do not understand and have no way of understanding (or uncovering through reasonable
5 diligence) that their use of the Products involves engagement with intentionally addictive design
6 features that are physically damaging to their brains and bodies, and financially rewarding to the
7 Defendants.

8 82. There is no disclosure of the addictive mechanisms designed as a part of each
9 Defendant's Products at the time they are purchased and/or downloaded to allow prospective users
10 to make informed decisions as to whether using the Products are desirable, appropriate, safe, or
11 worth the potential risk.

12 83. At all times material hereto, each Defendant targeted consumers/purchasers, including
13 minors, and specifically including Plaintiff Thomas K. Litton herein, to use their respective
14 Products and engage in microtransactions whereby in-game perks are exchanged for real money
15 through in-game targeted solicitations.

16 84. Each Defendant, with knowledge of Thomas K. Litton's age and California residency,
17 targeted Plaintiff Thomas K. Litton with manipulative programming to prolong use of their
18 Products in hopes of inducing Thomas K. Litton to engage in microtransactions during their use of
19 the Products. As a result of Thomas K. Litton's use of each Defendant's Products, and because of
20 the addictive design features incorporated into the Products, Thomas K. Litton was injured and
21 damaged as herein alleged.

22 **VI. Roblox**

23 **A. Roblox Gameplay Basics**

24 85. Roblox is a video game and platform that was developed and published by Roblox
25 Corp. The game was released in September 2006.

26 86. At present, Roblox has approximately 97.8 million daily active users.¹⁴

27
28 ¹⁴ Roblox Corp. Homepage, <https://corp.roblox.com/> (last visited July 24, 2025).

1 87. More than 45% of the consumers playing Roblox are under age 13.¹⁵

2 88. Roblox is available to play on gaming consoles, computers, tablets, and cellular
3 devices.

4 89. Roblox is an online game that is free to download and play, making it easily accessible
5 to all users, including minors.

6 90. Individuals that wish to play Roblox must create a Roblox account.

7 91. In order to create a Roblox account, individuals must include a birthdate, username,
8 and password.

9 92. Users of any age can create a Roblox account, though users cannot enter a birth date
10 for any year after 2020. Roblox Corp. does not require users to verify their age when creating a
11 Roblox account. Accordingly, users can represent that they are younger or older than their actual
12 age.

13 93. Users are also not required to obtain parental consent to create a Roblox account nor
14 to play Roblox.

15 94. After creating an account, all users are assigned a default player avatar – a cartoonish
16 character that represents the individual user within certain games. This avatar can be customized
17 with different outfits and appearances through in-game purchases made in the in-game Roblox store
18 using in-game currency known as Robux.

19 95. Robux can be obtained by (a) purchasing it with real currency; (b) receiving a
20 recurring stipend given to users with a Roblox Premium membership; and (c) earning it from selling
21 “game passes” or “developer Products” to other Roblox players.

22 96. Robux sales, and the revenue generated therefrom, increase as the number of active
23 daily and active monthly Roblox users increases.

24 97. Roblox has hosted over 3.7 billion virtual transactions on its platform.¹⁶
25

26
27 ¹⁵*The Roblox User Base*, Roblox Creator Hub, <https://create.roblox.com/docs/production/roblox-user-base> (last visited July 24, 2025).

28 ¹⁶*Earning on Roblox*, Roblox Creator Hub, <https://create.roblox.com/docs/production/earning-on-roblox> (last visited Aug. 23, 2024).

1 98. Roblox Corp. offers a Premium Membership option to users, which can be purchased
2 with Robux. A Premium Membership offers users exclusive items and discounts, Premium-only
3 levels within certain games, the ability to trade items with other users, and a stipend of Robux that
4 defrays the purchase cost of the Premium Membership.

5 99. Roblox gameplay is unique and different from many “traditional” games. When an
6 individual “plays” Roblox, they open the Roblox program, where they are presented with a myriad
7 of games (known as “experiences”) they can play.

8 100. Roblox Corp. groups each “experience” into four content-based categories: Minimal,
9 Mild, Moderate, and Restricted. Once the user creates an account, the user can access almost all of
10 Roblox’s content if they represent they are over 8 years old. If a user is under 9 years old, they are
11 only able to view Minimal and Mild content. If the user indicates they are between the ages of 9
12 and 17, the only content not accessible is content specifically marked as “Restricted,” which
13 requires ID verification to view.

14 101. These “experiences” or games available on Roblox are further sorted into different
15 genres/categories, including but not limited to: Sports, Role-Playing Games (RPG), Fighting, First
16 Person Shooters (FPS), Horror, Comedy, Military, and Naval.

17 102. The games available to any particular user will vary based upon the age they entered
18 when generating their account and what games Roblox’s algorithm recommends to the user.

19 103. While within the Roblox platform, players can jump back and forth between the games
20 Roblox presents to each player.

21 104. Most games available on the Roblox platform were not directly made by Roblox Corp.
22 Rather, the Roblox platform includes a game design feature, as detailed below, whereby Roblox
23 teaches users and provides tools for users to generate their own games and make them available on
24 the Roblox platform for others to play.

25 ///

26 ///

27 ///

28 ///

B. Roblox Corp.’s 2024 and 2025 Changes to Safety Settings

105. In November of 2024, Roblox Corp. announced, “major updates to [its] safety systems and parental controls.”¹⁷ It claimed these updates were implemented because “safety is and always has been foundational to everything [it does] at Roblox.”¹⁸

106. The changes Roblox Corp. made in 2024 included new labels for categories of content, changes to viewable content for each age group, parental controls for minors’ screen time usage, and a new minimum age at sign up.

107. In April of 2025, Roblox Corp. implemented further updates to parental controls, stating that “[s]afety underpins everything we do at Roblox, particularly the safety of our youngest users.”¹⁹ These 2025 updates included the ability for guardians to view their minor’s top Roblox games the minor has played and how long the minor spent in each game for the past week. Guardians can now also block specific games and experiences for their minors.

108. Prior to the 2024 changes, Roblox Corp. allowed all users, regardless of age, to view any content other than that marked “17+.” In fact, users as young as 2 or 3 could view any content on the platform that was not protected by age verification. Beginning in 2024, Roblox Corp. imposed stricter limits on the content viewable to users that represent they are younger than 9 years old. Even after these changes, however, users that represent they are older than 8 can still access all content not marked as “17+.”²⁰

109. Until 2024, Roblox Corp. did not provide parental controls for minors’ screen time and usage on Roblox. Roblox Corp. could have allowed parent-imposed time limits, but instead chose not to allow parents to set time limits on their minor’s Roblox account for over eighteen years of operation.

110. Until approximately September 2024, Roblox Corp. allowed users to represent their

¹⁷ *Major Updates to Our Safety Systems and Parental Controls*, Roblox Newsroom, <https://corp.roblox.com/newsroom/2024/11/major-updates-to-our-safety-systems-and-parental-controls> (last visited Nov. 25, 2024).

²⁰ “17+” content is now known as “Restricted” content on Roblox.

age as young as one year old and have access to virtually all content on the platform. Even now, parents whose minors are over the age of 12 cannot set restrictions on spending limits, set time limits, change privacy settings, or manage friends and communication on their minor's account.²¹ Roblox Corp.'s changes to parental controls in 2025 did not address these failures to protect and limit minor users.

111. Until 2025, Roblox Corp. did not provide guardians with the ability to block specific games and experiences, nor for guardians to view how much time their minor spends in each respective game.

112. The implementation of these restrictions and changes by Roblox Corp. in 2024 and again in 2025 demonstrates its understanding of its responsibility to implement such restrictions and safety measures, and further, demonstrates how easily Roblox Corp. can implement restrictions and safety measures in general. These changes also demonstrate that Roblox Corp. has control over access to not only its platform, but the games users are able to access on its platform. The changes that Roblox Corp. implemented in 2024 and in 2025 did not require game by game review by Roblox Corp., but instead were implemented as system-wide updates.

113. Roblox Corp. admits in publicly filed documents that it has the ability to "dynamically apply relevant content filters, anti-addiction rules, payment limits, parental consent requirements, and certain other regional requirements."²²

114. Despite its ability to implement anti-addiction rules, specific parental controls, payment limits, and restrictions, upon information and belief, Roblox Corp. instead chooses not to

²² Roblox Corporation, Form 10-K (Feb. 18, 2025), p. 14 (<https://www.sec.gov/ix?doc=/Archives/edgar/data/0001315098/000131509825000033/rblx-20241231.htm>). See e.g., Roblox Corporation, Form 10-K (Feb. 25, 2022), p. 15 (<https://www.sec.gov/ix?doc=/Archives/edgar/data/0001315098/000131509822000058/rblx-20211231.htm>); Roblox Corporation, Form 10-K (Feb. 28, 2023), p. 14 (<https://www.sec.gov/ix?doc=/Archives/edgar/data/0001315098/000131509823000035/rblx-20221231.htm>); Roblox Corporation, Form 10-K (Feb. 21, 2024), p. 15 (<https://www.sec.gov/ix?doc=/Archives/edgar/data/0001315098/000131509824000026/rblx-20231231.htm>).

1 implement those restrictions in order to increase its profit.²³

2 **C. Roblox is Marketed to Minors Yet Lacks Adequate Safety Features**

3 115. Roblox Corp. does not inform users of the inherent risks involved with using and
4 playing Roblox, specifically excluding that Roblox was designed to addict users to their extreme
5 harm and detriment.

6 116. Instead, Roblox Corp. provides users, potential users, and guardians false assurances
7 of safety.²⁴ For example, Roblox Corp. states that:

- 8 a. it has “built a platform with safety at the foundation.”²⁵
- 9 b. it “spend[s] hundreds of millions of dollars each year to meet [its] safety
10 mission.”²⁶
- 11 c. users should “learn about how Roblox’s commitment to safety and civility helps
12 students grow.”²⁷
- 13 d. its age recommendations for its Product are “grounded in child development
14 research and informed by industry standards,” essentially confirming its reliance
15 on scientific research about adolescent development and content consumption.²⁸
- 16 e. its recommendations are created by “examin[ing] global industry standards and
17 consult[ing] child development experts”²⁹; and

21 ²³ See Roblox Corporation, Form 10-Q (May 1, 2025), p. 68
22 (<https://www.sec.gov/ix?doc=/Archives/edgar/data/0001315098/000131509825000118/rblx-20250331.htm>) (“...[R]equirements for verified parental consent before allowing children to create
23 an account may limit the use of our Platform or reduce our overall demand for our Platform, which
24 would harm our business, financial conditions, and results of operations”).

27 ²⁸ Allowed Experience Controls, Roblox, <https://en.help.roblox.com/hc/en-us/articles/8863284850196-Allowed-Experiences-Controls> (last visited Apr. 8, 2025).

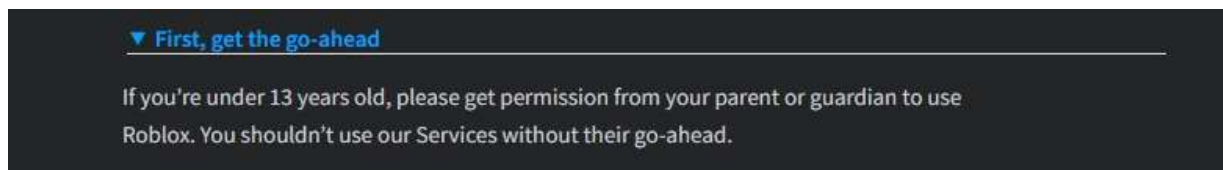

28 ²⁹ *Content Maturity Labels*, Roblox, <https://en.help.roblox.com/hc/en-us/articles/8862768451604-Content-Maturity-Labels> (last visited Apr. 8, 2025).

f. its Product is part of the “[n]ew era of teaching and learning,” and teaches educators how to “pilot Roblox in [their] class or school district,” assuring parents, educators, and students that its Product is safe for use of all ages.³⁰

117. While Roblox does feature some parental controls in its Product, almost all of these parental controls can only be applied to minors’ accounts if the minor is under 13, despite Roblox Corp.’s alleged desire to create one of the safest online environments.

118. None of Roblox’s parental controls (aside from content restrictions) are automatically applied or required when a minor creates an account. A minor can easily create an account and bypass any parental controls if their guardian is unaware of the account or the ability to enable parental controls.

119. Roblox Corp. states on its website that³¹:

120. Despite its acknowledgement that users under 13 should not “use [its] services without their [guardian’s] go-ahead,” Roblox Corp. provides absolutely no safeguards or requirement of parental consent when making an account, even if that user represents they are under the age of 13. Further, this instruction regarding parental permission does not reasonably coexist with Roblox Corp.’s acknowledgement that its game was created for children.

121. Roblox Corp. could, but chooses not to, require express parental consent for minors under 13 to create an account. Despite its acknowledgement that minors should get permission from guardians before using its Product, Roblox Corp. fails to require parental consent.

122. Additionally, Roblox Corp. only allows a parent to enable parental controls through their minor’s account or a linked account. To engage with/change any parental control settings or link a minor’s account to theirs, the parent must first know that the account exists, and subsequently

³⁰ Education, Roblox, <https://education.roblox.com/> (last visited Aug. 28, 2024).

³¹ Roblox Privacy and Cookie Policy, Roblox, <https://en.help.roblox.com/hc/en-us/articles/115004630823-Roblox-Privacy-and-Cookie-Policy> (last visited July 24, 2025).

1 know the log in information of their minor, or the minor must enter the parent's email address into
2 their Roblox account.³²

3 123. Until 2024, Roblox Corp. did not provide parental controls for minors' screen time
4 and usage on Roblox. Roblox Corp. could have allowed parent-imposed time limits, but instead
5 chose not to allow parents to set time limits on their minor's Roblox account.

6 124. Roblox Corp. could, but does not, allow any users to set self-imposed time limits on
7 their Roblox account.

8 125. Further, once a user reaches the age of 13, parents can no longer impose parental
9 controls on their minor's account.³³

10 126. The only Roblox content that is restricted by ID verification is "Restricted content."
11 Though Roblox Corp. has imposed content limits on users under the age of 9, a minor under the
12 age of 9 could easily create an account with a fictitious birth date representing they are over 8 and
13 access most of Roblox's games. Without age verification at account creation and/or to view specific
14 content, a minor under 9 can easily bypass Roblox's restrictions.

15 127. At account setup, Roblox's website contains no warnings labels, banners, or
16 messaging informing minor users or their guardians of the known risks and harms stemming from
17 the excessive use of Roblox Corp.'s Product. Users are not provided with information regarding
18 potential physical and mental harm associated with compulsive gameplay.

19 128. During gameplay, there are no warnings labels, banners, or messaging informing
20 minor users of the known risks and harms stemming from the use of Roblox Corp.'s Product. Users
21 are not provided with information regarding potential physical and mental harm associated with
22 compulsive gameplay.

23 129. Roblox Corp., while touting safety as a core value of its company, chooses not to

1 implement meaningful safety features, understanding that changes in parental controls and safety
2 features will reduce time spent in game and, ultimately, revenue.

3 **D. Roblox Corp.’s Monetization of Intentionally Addictive Game Design**

4 130. Roblox Corp. designed the game-creation aspect of its Product to allow users to create
5 their own Roblox video games for play and purchase by other Roblox users, including minors.
6 Though third parties create the games, Roblox Corp. profits from all monetary transactions that
7 occur within these third-party created games.

8 131. Roblox Corp. constructed a “Creator Hub” on its website. The Creator Hub provides
9 users with instructions (including “how-to” videos) from Roblox Corp. on how users can create
10 their own Roblox games and also provides users with tools that enable or facilitate creation of their
11 own Roblox games.

12 132. Users that create their own games are referred to as “Creators” or “Developers.”

13 133. Roblox Corp.’s website boasts that its top ten Developers made, on average, \$33.9
14 million in 2024.³⁴

15 134. Roblox Corp. reports its Developers have been collectively paid \$3.3 billion since
16 2018.³⁵

17 135. Roblox Corp. encourages creators to incorporate into games the tools that Roblox
18 Corp. created, and makes available within Roblox’s game design studio. To assist in teaching
19 current and potential Developers how to utilize Roblox’s tools and Roblox Studio, the Roblox
20 Corp.’s Creator Hub includes literature under topics such as: “Publishing,” “Promotion,” and
21 “Monetization.” The Creator Hub’s purpose is to teach potential creators “everything [they] need
22 to know about creating on Roblox.”³⁶

25
26 ³⁴ *Earn on Roblox*, Roblox Creator Hub, <https://create.roblox.com/docs/production/earn-on-roblox>
27 (last visited July 24, 2025).

28 ³⁵ *Id.*

³⁶ *Creation Overview*, Roblox Creator Hub, <https://create.roblox.com/docs/creation> (last visited
July 24, 2025).

136. The “Monetization” topic on the Creator Hub includes literature on monetization strategies, immersive ads, subscriptions, passes, developer Products, avatar items, engagement-based payouts, paid access, and private servers.³⁷

137. The Creator Hub discusses “Engagement-Based Payouts,” which lets the Developer “earn Robux based on the share of time that Premium members engage in an experience.”³⁸

138. Roblox Corp.’s Creator Hub encourages Developers to keep users playing their game(s) for as long as possible to increase the Developer’s profits, and in turn, Roblox Corp.’s.

139. The Creator Hub provides instructions on how Developers can access their “payout data,” which will help the Developer “understand what factors drive Premium subscribers to [their] experiences.”³⁹ Analytics on the website provide data and insight to grow a Developer’s audience.⁴⁰

140. One of the tools Roblox Corp. created and is featured on Roblox’s Creator Hub is a “season pass.” As described above, a season pass allows players to pay real-world money to obtain access to exclusive items that are available to be purchased for a limited time through points earned during game play. Compl. ¶ 78. Roblox Corp.’s Creator Hub encourages the use of season passes to motivate players to continue playing Developers’ games, create a sense of urgency regarding items offered for the season, and create anticipation for the next season to keep players coming back.⁴¹

141. Roblox Corp. therefore encourages and gives step-by-step instructions for Developers to incorporate Roblox’s harmful and addictive algorithms, programming, and strategies, including microtransactions and features without warnings or time restrictions, as described hereafter, into each of their games resulting in Roblox Corp. earning significant profits from each game it helped design, host, and promote on its platform.

³⁷ *Monetization*, Roblox Creator Hub, <https://create.roblox.com/docs/production/monetization> (last visited July 24, 2025).

³⁸ *Engagement-Based Payouts*, Roblox Creator Hub, <https://create.roblox.com/docs/production/monetization/engagement-based-payouts> (last visited July 24, 2025).

³⁹ *Id.*
⁴⁰ Roblox Creator Hub, <https://create.roblox.com/> (last visited July 24, 2025).

⁴¹ *Season Pass Design*, Roblox Creator Hub, <https://create.roblox.com/docs/production/game-design/season-pass-design> (last visited July 24, 2025).

142. Beyond working with Developer to create additive games, Roblox Corp. purposefully designed other features within its Product to intentionally addict users.

143. Roblox Corp. designed an achievement system within Roblox that rewards users for completing various tasks or actions. These achievements are not based upon a user's time or actions within a third-party game "experience," but rather the user's time and actions on Roblox's platform itself. For example, a user playing Roblox can unlock an achievement for playing Roblox for three days in a row, ten days in a row, and twenty days in a row. Likewise, users can earn an achievement for playing Roblox for an hour. When the user unlocks an achievement, they can see what percentage of other users have unlocked the achievement. This system is designed to keep users engaged with the game, incentivize long periods of gaming repeated across multiple days, and ultimately increase Roblox Corp.'s profits.

144. Roblox Corp. knows its Product incorporates addictive designs that pose risks of causing users to develop dangerous and disordered use and overuse of the Product. In fact, Roblox Corp. developed addictive strategies, game designs, and monetization schemes, implemented them on the Roblox platform itself and then instructed those developing "experiences" for its platform to incorporate those addictive features into their games that would be offered to minors. Nonetheless, Roblox Corp. chose to not inform the consuming public at large, users, or guardians of minors who are users, of such risks.

145. Upon information and belief, Roblox Corp. designed Roblox and the addictive strategies, game designs, and monetization schemes offered in its game and game design studio in conjunction with psychologists, neuroscientists, and other behavioral experts to intentionally maximize the likelihood of addiction of minor and neurodivergent users.

146. Roblox Corp. admits to consulting child development experts for aspects of game

How is an Age Recommendation determined?

Roblox's age recommendations are grounded in child development research and informed by industry standards. To determine which audiences an experience is generally suitable for, we examined global industry standards and consulted child development experts.

development.⁴²

147. Roblox Corp. actively employs or has employed psychologists and behavioral experts within its People Science and Analytics department and User Experiences department.⁴³

148. The use of operant conditioning, the use of microtransactions within an otherwise free Product, a lack of warnings about the harms of use, no self-imposed limits on playtime, an achievement system that rewards prolonged and repeated gaming sessions, and other features described herein are all examples of Roblox Corp. employing harmful psychological tactics to take advantage of the chemical reward system of a user's brain (especially a minor or neurodivergent person) to create addictive engagement, despite Roblox Corp.'s knowledge that abuse and compulsive use of its Product by foreseeable users, *i.e.*, minors and neurodivergent individuals, can and did lead to users, including Plaintiff Thomas K. Litton, suffering impacts on brain function, addiction, withdrawal symptoms, negative consequences on cognitive processes, and other injuries. Roblox Corp. marketed and misrepresented Roblox as safe for all ages without warning of said risk of injury and addictive design, ultimately helping create and foster an epidemic of video game addiction in minors.

VII. Fortnite

A. Fortnite Gameplay Basics

149. Fortnite is an online video game and game platform designed, developed, and published by Epic Games.

150. Fortnite is free to play, making it easily accessible to all users, including minors.

151. Fortnite was first released in 2017 and is now available in three distinct game mode versions that share the same general design and engine.

152. Fortnite: Battle Royale is a free-to-play battle royale game in which up to 100 users fight in a progressively shrinking arena to be the last person standing. Users can play alone, in a

⁴² Allowed Experience Controls, Roblox, <https://en.help.roblox.com/hc/en-us/articles/8863284850196-Allowed-Experiences-Controls> (last visited Aug. 28, 2024).

⁴³ See, e.g., Erica Snow, LINKEDIN, <https://www.linkedin.com/in/erica-snow-phd-75272b39> (last visited July 24, 2025); Philip Simmons, LINKEDIN, <https://www.linkedin.com/in/philippsimmons> (last visited July 24, 2025); Carissa Kang, LINKEDIN, <https://www.linkedin.com/in/carissakang> (last visited July 24, 2025).

duo, or in a “squad” of 3-4 players. When users land “inside the game,” the user must scavenge for weapons, items, resources, and vehicles while trying to stay alive, attack, and eliminate other users. Battle Royale is frequently Fortnite’s most popular game and is the game mode to which many attribute Fortnite’s success.⁴⁴

153. Fortnite: Save the World is a cooperative hybrid tower defense-shooter and survival game in which up to four users fight off zombie-like creatures and defend objects with traps and fortifications they can build. Users are awarded a number of in-game items from and during missions, including hero characters, weapon and trap schematics, and survivors, all of which can be leveled up through gained experience to improve their attributes. Save the World is the only pay-to-play game mode of the Fortnite franchise.

154. Fortnite Creative is a sandbox game mode in which users are given complete freedom to create worlds by spawning any item from Battle Royale on a personal island and can create games such as battle arenas, racecourses, platforming challenges, and more.

155. Each of Epic Games’s herein listed Fortnite Products has similar graphics, art assets, and game mechanics.

156. Fortnite has an average of 239 million monthly players and a peak of 15 million players in a day.⁴⁵

157. Less than two years after Fortnite’s release, the games had generated over \$9 billion in revenue through microtransactions and in-game purchases. In 2021 alone, Fortnite generated \$5.8 billion in revenue.⁴⁶

158. Fortnite game Products are monetized using V-Bucks: in-game currency that can be purchased with real-world funds or earned through completing missions and other achievements in Save the World.

⁴⁴ The Week Staff, *What is Fortnite and Why is it So Popular?*, The Week, <https://theweek.com/93700/fortnite-battle-royale-news> (Aug. 3, 2018).

⁴⁵ This statistic is as of July 2023. *Fortnite Player Count: How Many People Play the Game?* The Econ. Times (Jul. 14, 2023), <https://economictimes.indiatimes.com/news/international/us/fortnite-player-count-how-many-people-play-the-game/articleshow/101767141.cms?from=mdr>.

⁴⁶ Sunil Gill, *Fortnite Revenue, Player Count & Net Worth 2024*, Priori Data (Apr. 1, 2024), <https://prioridata.com/data/fortnite-statistics/>.

159. Fortnite includes a feature called a “Battle Pass,” which is identical to the “season pass” feature described above. Compl. ¶ 78. The Battle Pass in Fortnite allows players to earn various rewards by “levelling up” the Pass. Levelling up can be done by earning medals during gameplay, completing challenges, and purchasing the levels with V-Bucks.⁴⁷ The purpose of the Battle Pass is to keep players engaged in hours of gameplay trying to earn rewards, and to increase profits for Epic Games through the purchase of in-game content.

B. Fortnite’s Youth-Focused Partnerships Contradict Game Rating but Increase Profits

160. Fortnite’s Battle Royale and Save the World are rated T for Teen, *i.e.*, recommended for individuals aged 13 and above. This does not mean younger children cannot play these games or that Epic Games does not know that children under 13 are using Fortnite Products. Rather, Epic Games is aware and markets Fortnite to consumers of all ages, and particularly to minors.

161. Despite its T rating, survey results from 2019 show that 53% of U.S. children aged 10-12 played Fortnite weekly, compared to 33% of U.S. teens aged 13-17.⁴⁸

162. Even though most Fortnite games are rated T, Fortnite (specifically Battle Royale) has engaged in numerous in-game virtual collaborations with child-friendly entities such as Disney, LEGO, Marvel, NERF, Air Jordan, DC Comics, PAC-MAN, the NFL, Ninja, Rocket League, Ghostbusters, Star Wars, TRON, Neymar Jr., the NBA, LeBron James, Ariana Grande, Naruto, Naomi Osaka, Indiana Jones, Dragon Ball, Spiderman, Batman, TikTok, The Nightmare Before Christmas, Wreck-It Ralph, Lewis Hamilton, Teenage Mutant Ninja Turtles, Nike, Pirates of the Caribbean, and more.⁴⁹

⁴⁷ *What is the Battle Pass? Where Can I Learn More?*, Fortnite Support, https://www.epicgames.com/help/en-US/c-Category_Fortnite/c-Fortnite_Gameplay/what-is-the-battle-pass-where-can-i-learn-more-a000084706 (last visited July 24, 2025).

⁴⁸ National Research Group, *Fortnite: The New Social Media?* (June 4, 2019), available at https://assets.ctfassets.net/0o6s67aqvwnu/5z4ja8fNx2NputEG49AVWs/ff1f591ad988f9a30856bab68e3908bb/NRG_Fortnite_White_Paper.pdf.

⁴⁹ Josh Taylor, *Every Single Fortnite Collab & Crossover in Battle Royale’s History*, Dexerto (Aug. 26, 2024), <https://www.dexerto.com/fortnite/every-fortnite-collab-crossover-battle-royale-history-1645672/>.

163. Most, if not all, of these collaborations are geared towards a wide audience that unmistakably includes minors under the age of 13. Many young children watch Disney movies, play with LEGOs, or listen to the music of pop stars like Ariana Grande. Epic Games is explicitly and intentionally marketing its Fortnite games to young children by collaborating with the above entities.

164. Not only does Epic Games engage in in-game collaborations, but it also has physical merchandise it produces or sponsors, most of which are toys or children's items. For example, Epic Games creates Fortnite themed plastic toy loot boxes and battle boxes, action figures, NERF guns, trading cards, board games, motorized toy cars, LEGO sets, and Halloween costumes. Epic Games has partnered with children's toymakers like Hasbro to create some of these items.

165. Epic Games knows that young children play Fortnite.

166. Epic Games organizes its advertisement and collaboration strategies around the interests of young children. And in 2024, Epic Games's projected annual revenue is \$5.8 billion.⁵⁰ As a result of, in part, its partnership strategies, Epic Games will make a significant portion of that \$5.8 billion from young children and their families, while its partnerships further encourage children under 13 to keep using its Products.

C. **Fortnite was Designed with Intentionally Addictive Features**

167. Epic Games knows that minors and those who are susceptible to addiction are using its Product, but nonetheless chose to add features to its Product to intentionally addict such users.

168. Epic Games actively employs or has employed psychologists and behavioral experts within its User Experiences department and Online department.⁵¹

169. Upon information and belief, Epic Games designed Fortnite in conjunction with

⁵⁰ Josh Howarth, *Fortnite User and Growth Stats 2024*, Exploding Topics (Jul. 22, 2024), <https://explodingtopics.com/blog/fortnite-stats>.

⁵¹ See, e.g., Ben Taels, LINKEDIN, <https://www.linkedin.com/in/ben-taels-06913a15> (last visited July 24, 2025); Celia Hodent, LINKEDIN, <https://www.linkedin.com/in/celiahodent> (last visited July 24, 2025); *Video Games, Psychology, and the User Experience with Dr. Celia Hodent (Epic Games)*, NC State University Libraries, [https://www.lib.ncsu.edu/events/video-games-psychology-and-user-experience-dr-celia-hodent-epic-games#:~:text=Video%20Games%2C%20Psychology%2C%20and%20the,Games\)%%20%7C%20NC%20State%20University%20Libraries](https://www.lib.ncsu.edu/events/video-games-psychology-and-user-experience-dr-celia-hodent-epic-games#:~:text=Video%20Games%2C%20Psychology%2C%20and%20the,Games)%%20%7C%20NC%20State%20University%20Libraries) (Feb. 2, 2016); Katelyn Procci, LINKEDIN, <https://www.linkedin.com/in/katelynprocci> (last visited July 24, 2025).

1 psychologists and other behavioral experts to intentionally maximize the likelihood of addiction of
2 minor and neurodivergent users.

3 170. Epic Games utilizes countless strategies to intentionally maximize the likelihood of
4 addiction of its users. For example, Epic Games designed an achievement system within Fortnite
5 that rewards users for completing various tasks or actions. One such achievement is earned when a
6 user saves 10,000 survivors in successful missions. Another such achievement is unlocked when a
7 user completes 1,000 missions. When the user unlocks an achievement, they can see what
8 percentage of other users have unlocked the achievement. Many achievements are difficult to obtain
9 and require hundreds of hours of gameplay to unlock. This system is designed to keep users engaged
10 with the game, incentivize long periods of gaming over many days, and ultimately increase Epic
11 Games' profits.

12 171. Likewise, as noted above, Epic Games designed a Battle Pass system that is designed
13 to encourage players to continually play in order to earn various time-limited in-game rewards and
14 cosmetics by obtaining points through the completion of increasingly difficult challenges across
15 repeated hours and sessions of gameplay or by spending real-world money through V-Bucks.

16 172. These addictive features found within Fortnite are intentionally designed and placed
17 within the game to encourage continued and compulsive use, furthering user addiction.

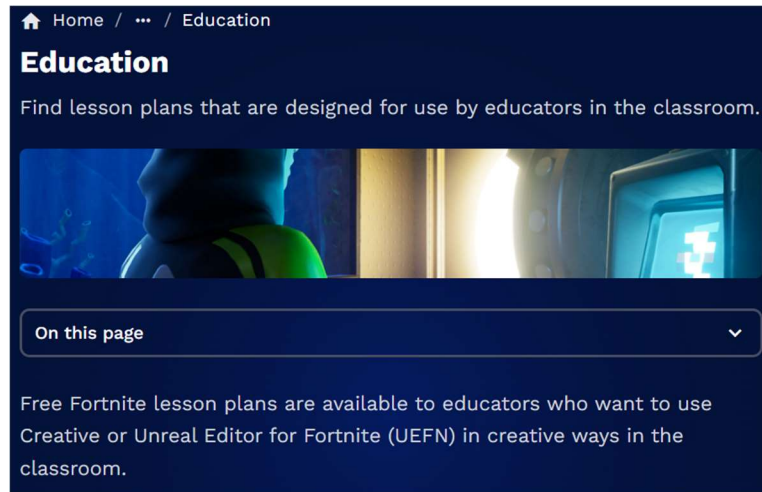

18 **D. Epic Games Deceptively Promises Safety and Educational Value in Fortnite**

19 173. Epic Games assures users that it wants its Product to be a “safe . . . place for [users]
20 to play games.”⁵²

21 174. Epic Games does not disclose to the public or the users of Fortnite any of the
22 psychological tactics or addictive features it purposefully incorporates into its Product. Instead,
23 Epic Games touts Fortnite as “educational” and markets it for use in the classroom.

24
25
26
27
28 ⁵² *Epic Games: Community Rules*, Epic Games, <https://www.epicgames.com/site/en-US/community-rules> (last visited July 24, 2025).

175. On its website, Epic Games even offers “Free Fortnite lesson plans” to educators on subjects ranging from history, geography, and programming.⁵³

176. Epic Games joined the Family Online Safety Institute (“FOSI”) in 2023, stating it wants to “support [FOSI’s] work to keep kids safe online.” Epic Games’s Senior Director of Public Policy represents Epic Games wants to “be on the forefront of creating fun and safe games and experiences for people of all ages,” emphasizing its alleged focus on the importance of safety for children playing its games, including Fortnite.⁵⁴

177. Despite assurances of safety, the addictive properties and design features, as alleged herein, of Fortnite are so dangerous to users, and especially minors, that several health and behavioral centers across the country have published resources for parents specifically warning about Fortnite addiction.⁵⁵ Many health experts have concluded that Fortnite can be as addictive as heroin and other illegal drugs.⁵⁶

178. Despite these third-party warnings of the dangers of Fortnite, Epic Games has failed to disclose the risks of harm purposefully built into Fortnite, and has failed to protect minor users

⁵³ Education, Epic Games, <https://dev.epicgames.com/documentation/en-us/fortnite-creative/education-in-fortnite-creative> (last visited Apr. 8, 2025).

⁵⁴ Epic Games Joins the Family Online Safety Institute, FOSI (Nov. 28, 2023), <https://www.fosi.org/about-press/epic-games-joins-the-family-online-safety-institute>.

⁵⁵ Rachel Ehmke, *A Parent’s Guide to Dealing With Fortnite*, Child Mind Institute, <https://childmind.org/article/parents-guide-dealing-fortnite/> (last visited Aug. 26, 2024).

⁵⁶ Health Experts: Video Game “Fortnite” Can Be Addictive As Heroin, KRON ABC 8 News (Sep. 29, 2018), <https://www.wric.com/news/whats-trending/health-experts-video-game-fortnite-can-be-addictive-as-heroin/>.

1 using its Product. While Fortnite does feature some parental controls, they are grossly deficient.
2 Although minor accounts automatically restrict some in-game communication, there is no age
3 verification process. If a minor who is under 13 wants to sign up with a fictitious birth date, they
4 can, and can play Fortnite without the restrictions of an account where the user represents they are
5 under 13.

6 179. Fortnite could, but chooses not to, require express parental consent for minors under
7 13 to create an account. If a minor under 13 creates an account, they can still access most game
8 content and purchase items.

9 180. Fortnite imposes a daily spending limit on minors under 13, however, that limit is
10 \$100 per *day*.⁵⁷ A minor under 13 could spend \$36,500 on Fortnite in a year without any parental
11 consent or permission.

12 181. While Fortnite imposes *some* automatic restrictions on minor's accounts if the user is
13 under 13, the parental controls and restrictions can only be accessed via the minor's account. To
14 engage with/change any parental control settings, the parent must first know that the account exists,
15 and subsequently know the log in information of their minor.

16 182. Epic Games does not provide parental controls regarding screen time, gameplay,
17 and/or usage. Epic Games could, but chooses not to, allow parents to set time limits on their minor's
18 Fortnite account. Epic Games also could, but does not, allow users to set self-imposed time limits
19 on their Fortnite account.

20 183. At account setup, Fortnite's website contains no warnings labels, banners, or
21 messaging informing minor users or their guardians of the known risks and harms stemming from
22 the excessive use of Epic Games's Product. Users are not provided with information regarding
23 potential physical and mental harm associated with gameplay.

24 184. During gameplay, there are no warnings labels, banners, or messaging informing
25 minor users or their guardians of the known risks and harms stemming from the use of Epic Games's
26

27 ⁵⁷ Daily Spending Limits For Players Under 13, Epic Games, [https://www.epicgames.com/help/en-](https://www.epicgames.com/help/en-US/c-Category_EpicAccount/c-EpicAccounts_ParentalControls/daily-spending-limits-for-players-under-13-a000085524)
28 [US/c-Category_EpicAccount/c-EpicAccounts_ParentalControls/daily-spending-limits-for-players-](https://www.epicgames.com/help/en-US/c-Category_EpicAccount/c-EpicAccounts_ParentalControls/daily-spending-limits-for-players-under-13-a000085524)
[under-13-a000085524](https://www.epicgames.com/help/en-US/c-Category_EpicAccount/c-EpicAccounts_ParentalControls/daily-spending-limits-for-players-under-13-a000085524) (last visited July 24, 2025).

1 Product. Users are not provided with information regarding potential physical and mental harm
2 associated with gameplay.

3 185. Epic Games designed and developed Fortnite games with the use of addictive operant
4 conditioning to make users want to keep using the Product more and more.

5 186. The team that developed Fortnite includes psychologists, statisticians, analysts, and
6 coordinators who worked for nearly four years to develop a Product that was as addictive as
7 possible.

8 187. Upon information and belief, Epic Games has licensed patented addictive technologies
9 from other video game developers and publishers to include additional addictive features in
10 Fortnite.

11 188. Engaging and addicting users who are minors early and in environments such as their
12 classroom increases Epic Games's revenue through continued use of Fortnite by young users, at the
13 expense of these users' mental and physical health.

14 189. Epic Games knew that its Fortnite Product contained an inherent risk of abuse,
15 addiction and compulsive use by minors and the harms that arise therefrom, but instead of
16 disclosing such harms, Epic Games marketed Fortnite as "educational" and safe for use by minors
17 (inside and outside the classroom).

18 190. The use of operant conditioning, the use of microtransactions within an otherwise free
19 Product, a lack of warnings about the harms of use, no self-imposed limits on playtime, an
20 achievement system that rewards prolonged and repeated gaming sessions, and other features
21 described herein are all examples of Epic Games designing Fortnite with harmful psychological
22 tactics to take advantage of the chemical reward system of a user's brain (especially a minor or
23 neurodivergent person) and to create addictive engagement, despite Epic Games' knowledge that
24 abuse and compulsive use of its Product by foreseeable users, *i.e.*, minors and neurodivergent
25 individuals, can and did lead to users, including Plaintiff Thomas K. Litton, suffering impacts on
26 brain function, addiction, withdrawal symptoms, negative consequences on cognitive processes,
27 and other injuries. Epic Games marketed and misrepresented Fortnite as safe for all ages without
28

warning of said risk of injury and addictive design, ultimately helping create and foster an epidemic of video game addiction in minors.

VIII. Minecraft

A. Mojang and Microsoft Design, Develop, and Market Minecraft

191. Minecraft was first developed and released by Mojang in November 2011.

192. In September 2014, Microsoft acquired Mojang and its intellectual property (including Minecraft).

193. After its acquisition of Mojang, Microsoft has been directly and actively involved with Mojang in the design, development, testing, production, manufacture, labeling, marketing, advertising, promotion, supply, sale, and distribution of Minecraft. Indeed, since acquiring Mojang, Microsoft has overseen over 125 updates to Minecraft.

194. To date, over 300 million copies of Minecraft have been sold,⁵⁸ and the game averages around 200 million players per month.⁵⁹

B. Minecraft Gameplay Basics

195. Minecraft is a 3D sandbox game that can be played on a PC, various gaming consoles including Xbox, and mobile devices.

196. Minecraft's visual design is simple, using blocky, pixelated graphics, and basic colors.

197. The game itself is easy for users to learn and understand. Gameplay involves the user's character collecting resources, exploring the Minecraft world, crafting items, and trying to survive. The Minecraft world is virtually infinite and is generated based on the user's exploration.

198. There are multiple game modes, including survival mode and creative mode. Users in survival mode must gather resources to build structures and maintain their health while avoiding attacks from monsters known as "mobs." Users in creative mode have access to unlimited resources

⁵⁸ Britney Nguyen, *Minecraft Just Surpassed 300 Million Sales—Here's The Only Video Game Still Beating It*, Forbes (Oct. 16, 2023), <https://www.forbes.com/sites/britneynguyen/2023/10/16/minecraft-just-surpassed-300-million-sales-heres-the-only-video-game-still-beating-it/#:~:text=Minecraft%20has%20reached%20over%20300,Minecraft%20Live%202023%20this%20weekend..>

⁵⁹ Spencer Whitworth, *Minecraft Live Player Count (September 2024)*, Sportskeeda (Apr. 1, 2025), <https://www.sportskeeda.com/minecraft/minecraft-live-player-count>.

1 they can use to craft items or create structures. Within the creative game mode, the user cannot get
2 hurt by attacking “mobs.” Each game mode offers slightly different building abilities and access to
3 resources.

4 199. Minecraft users are encouraged to join different “worlds,” which can include
5 multiplayer or single-player worlds depending on what kind of world the user enters. To generate
6 a world to play in, users utilize “seeds” which are essentially computer codes. Once a player enters
7 a seed, the code creates a world for the user to explore. The seed shapes the landscape of the world.

8 200. The exact structures of most worlds are unique to that world, but worlds created with
9 the same seed will be identical. Users can share seeds with friends so the friends can create the
10 same world using that seed.

11 201. Mojang and Microsoft designed Minecraft with multiplayer options, allowing players
12 to interact and communicate with each other in the game world.

13 202. There are different versions of Minecraft available for play depending on the platform
14 used. The original version of Minecraft, now called “Minecraft Java,” is available for play on a PC.
15 The most popular version of Minecraft, and the version available on most platforms, is called
16 “Minecraft Bedrock.” Minecraft Java and Minecraft Bedrock are similar; however, the Bedrock
17 version is still currently updated and has additional features that Minecraft Java does not have.

18 203. In order to play Minecraft, users must purchase the game and create a Minecraft
19 account.

20 204. To create a Minecraft account, users must input a pre-existing Microsoft account, or
21 create a Microsoft account, and choose a password. Users of any age can create a Minecraft account.
22 There is no age verification upon sign-up on the Minecraft website.

23 205. Minecraft has its own form of currency called “Minecoins.” One Minecoin is worth
24 less than one US dollar. Minecoins can only be purchased with real currency.

25 206. Minecoins can be used to purchase various in-game features such as new skins for the
26 user’s avatar, “texture packs” that change the appearance of building blocks within the game,
27
28

1 “mash-up packs” that allow users to enter themed worlds with special textures and skins, mini
2 games, and access to new adventures via adventure maps.⁶⁰

3 207. In addition to the base game, users can purchase a “Marketplace Pass” for \$3.99 per
4 month. The Pass allows subscribers to “[p]lay 150+ pieces of exciting content,...dive into worlds,
5 mash-ups, skins packs, texture packs, and more.” New content is added every month to the Pass.⁶¹

6 208. Users can also purchase a “Realms Subscription” which allows them to run their own
7 Minecraft server and share their Marketplace Pass items with up to 10 friends. A Realms
8 Subscription starts at \$3.99 per month.

9 209. In 2024, Minecraft brought Microsoft and Mojang approximately \$220 million in
10 revenue.⁶²

11 **C. Minecraft Markets to Young Children to Increase Profits**

12 210. Minecraft is rated as safe for children 10 and older by the Entertainment Software
13 Rating Board (“ESRB”), which is the leading game-rating system for games in the United States.

14 211. Nonetheless, Microsoft and Mojang know that much of Minecraft’s player base is
15 younger than 10.

16 212. Studies have shown that approximately 53% of children aged 6 to 8 and 68% of
17 children aged 9 to 12 play Minecraft.⁶³

18 213. Despite Minecraft’s age rating, Minecraft has engaged in numerous in-game virtual
19 and physical product collaborations with child-friendly entities such as LEGO, Avengers,
20 Guardians of the Galaxy, Spiderman, Moana, Star Wars, Sonic the Hedgehog, Super Smash Bros.,
21

28 ⁶³ Jane Mavoa & Marcus Carter, *Minecraft Teaches Kids About Tech, But There’s A Gender
Imbalance At Play*, The Conversation (Jan. 16, 2018), [https://theconversation.com/minecraft-
teaches-kids-about-tech-but-theres-a-gender-imbalance-at-play-89496](https://theconversation.com/minecraft-teaches-kids-about-tech-but-theres-a-gender-imbalance-at-play-89496).

1 The Incredibles, Angry Birds, Frozen, Ice Age, Sponge Bob Square Pants, Toy Story, Minions,
2 Power Rangers, Fortnite, and more.⁶⁴

3 214. Most, if not all, of these collaborations are geared towards a wide audience that
4 unmistakably includes minors under the age of 10. Many young children watch Disney movies or
5 play with LEGOs or Hot Wheels. Microsoft and Mojang explicitly and intentionally market
6 Minecraft to young children by collaborating with the above entities.

7 215. In addition to virtual collaborations, Microsoft and Mojang also have physical
8 Minecraft merchandise they produce or sponsor, most of which are toys or children's items. For
9 example, Microsoft and Mojang have created a kids educational touchscreen smart watch; an LED
10 lamp that looks like a Minecraft torch; a glitter motion light; plush toys based on Minecraft
11 characters; Minecraft themed LEGO sets, action figures, board games, and Hot Wheels; foam
12 weapons; clothing; pajamas; and Halloween costumes. Minecraft also has a line of books for
13 children as young as five that are intended to teach children how to read.

14 216. Microsoft and Mojang organize their advertisement and collaboration strategies
15 around the interests of young children and make a significant portion of their revenue from young
16 children and their families.

17 **D. Microsoft and Mojang Deceptively Promise Safety and Educational Value in**
18 **Minecraft**

19 217. Microsoft and Mojang do not inform users of the inherent risk of addiction involved
20 with using and playing Minecraft or that the Product was designed to make users play more to their
21 potential harm.

22 218. Instead, Minecraft's website provides users, potential users, and guardians with false
23 assurances of safety. For example, Microsoft and Mojang state that:

- 24 a. they "hold [them]selves accountable for making Minecraft as safe as possible for
25 everyone."⁶⁵

26
27 ⁶⁴ *Category: Collaborations*, Minecraft Wiki, <https://minecraft.wiki/w/Category:Collaborations>
(last visited July 24, 2025).

28 ⁶⁵ *Minecraft Help Center – General Safety*, Minecraft, <https://help.minecraft.net/hc/en-us/articles/8047895358605> (last visited July 24, 2025).

b. it is “so important that [their] games are a safe and welcoming place for all players.”⁶⁶

c. “player safety is a priority for Mojang to ensure everyone feels safe.”⁶⁷

d. their “community standards help [them] build a community that is open and safe for everyone.”⁶⁸

219. Minecraft does feature some parental controls, but they are grossly deficient. While minor accounts for children younger than 16 are automatically created with some restrictions on in-game communications and other features, there is no age verification process. If a minor who is under 16 wants to create a Minecraft account with a fictitious birth date, they can, and can then create an account and play Minecraft without the restrictions of an account where a user represents they are under 16.

220. Microsoft and Mojang could, but choose not to, require express parental consent for minors under 16 to create an account. If a minor under 16 creates an account, they can still access almost all game content and purchase items. There is no daily spending limit automatically imposed on any minor accounts.

221. Guardians can access parental controls to change the automatic restrictions set by Microsoft and Mojang if their minor is under 16, however, such features are only available if a parent creates their own account and links it to the minor’s account. To engage with/change any parental control settings, the parent must first know the account exists, and subsequently know the gamertag information to link their account to their minor’s account.

222. Microsoft and Mojang do not provide parental controls within Minecraft regarding screen time, gameplay, and/or usage. Microsoft and Mojang could, but choose not to, allow parents to set time limits on their minor’s Minecraft account. Microsoft and Mojang also could, but do not, allow any users to set self-imposed time limits on their Minecraft account.

⁶⁶ *Id.*

⁶⁷ *Community Standards for Minecraft*, Minecraft, <https://www.minecraft.net/en-us/community-standards> (last visited July 24, 2025).

⁶⁸ *Minecraft End(er)-User License Agreement (“EULA”)*, Minecraft, <https://www.minecraft.net/en-us/eula> (last visited Apr. 8, 2025).

223. At account setup, Minecraft’s website contains no warnings labels, banners, or messaging informing minor users of the known risks and harms stemming from excessive use of Microsoft and Mojang’s Product. Users, or those linked to a minor’s account as the user’s guardian, are not provided with information regarding potential physical and mental harm associated with gameplay.

224. During gameplay, there are no warnings labels, banners, or messaging informing minor users or their guardians of the known risks and harms stemming from the use of Microsoft and Mojang’s Product. Users, or those linked to a minor’s account as the user’s guardian, are not provided with information regarding potential physical and mental harm associated with gameplay.

225. Microsoft and Mojang do not inform, users of the inherent risks involved with using Minecraft, specifically excluding that Minecraft was designed to addict users to their extreme harm and detriment.

226. Microsoft and Mojang do not disclose to the public or users of Minecraft any of the psychological tactics or addictive features they purposefully incorporate into their Product. Instead, Microsoft and Mojang tout their Minecraft game as educational and have developed Minecraft: Education Edition for use in the classroom.

227. Minecraft: Education Edition (“Minecraft Education”) is a game-based learning platform. Minecraft Education uses the Minecraft graphics with “features built specifically for learning environments.” It includes over “600 standards-aligned lessons,”⁶⁹ and includes coursework across various subjects.⁷⁰

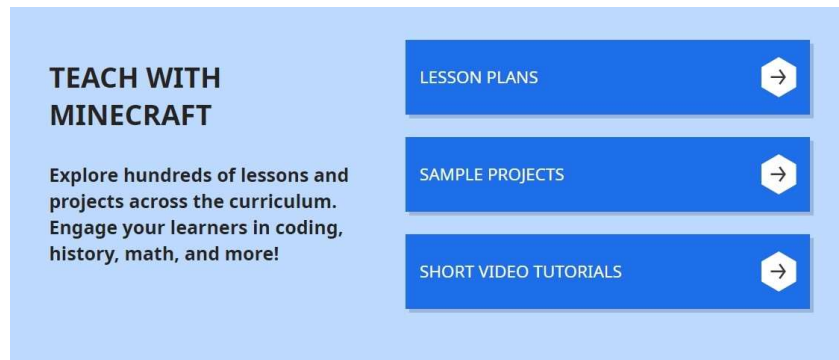

228. Though Minecraft’s age-rating is for children 10 and older, Minecraft Education has lesson plans for children as young as 5⁷¹, and encourages school leaders, educators, and parents to

⁶⁹ *What is Minecraft Education?*, Minecraft Education, <https://education.minecraft.net/en-us/discover/what-is-minecraft> (last visited July 24, 2025).

⁷⁰ *Minecraft Education For Educators: Get Started*, Minecraft Education, <https://education.minecraft.net/en-us/get-started/educators> (last visited July 24, 2025).

⁷¹ Minecraft’s own website states “[s]oon students from kindergarten to graduation can utilize Minecraft Education.” *Back to School Preview: Make it Minecraft!*, Minecraft Education (Apr. 8, 2025), <https://education.minecraft.net/en-us/blog/back-school-preview-make-it-minecraft>.

use Minecraft. Minecraft Education provides resources so educators can “learn to teach with Minecraft.”⁷²

229. The use of Minecraft Education introduces children to the game that are years younger than Minecraft’s age rating.

E. Minecraft was Designed with Intentionally Addictive Features

230. Microsoft and Mojang know that minors and those who are susceptible to addiction are using their Product, but nonetheless chose to add features to Minecraft to intentionally addict such users.

231. Upon information and belief, Microsoft and Mojang actively employ or have employed psychologists and behavioral experts to work on Minecraft development.

232. Upon information and belief, Microsoft and Mojang designed Minecraft in conjunction with psychologists, neuroscientists, and other behavioral experts to ensure the addiction of minor and neurodivergent users.

233. Upon information and belief, Microsoft and Mojang have licensed patented addictive technologies from other video game developers and publishers to include additional addictive features in the Minecraft Product.

234. One example of an intentionally addictive feature within Minecraft is a specific in-game reward system known as “advancements” or “achievements” created by Microsoft and Mojang in order to incentivize players to engage in repeated and prolonged sessions playing Minecraft.

⁷² *Minecraft Education For Educators: Get Started*, Minecraft Education, <https://education.minecraft.net/en-us/get-started/educators> (last visited Apr. 8, 2025).

235. In Minecraft Java, when a user completes a specific action or “advancement,” they receive a number of “Experience Orbs” or “EXP” or “XP”, which are used like a currency to enhance user’s in-game equipment and reach new levels of the game. XP is gained by performing specific tasks, like successfully defending a village from a raid or killing a hostile monster:⁷³

	Hero of the Village	Successfully defend a village from a raid	Voluntary Exile	Kill at least one raid mob during a raid and wait until it ends in victory. <i>This is a hidden advancement, meaning that it can be viewed by the player only after completing it, regardless of if its child advancement(s), if any, have been completed.</i>	adventure/hero_of_the_village	 100 experience
---	----------------------------	---	-----------------	---	-------------------------------	--

236. When a user obtains enough XP, they can “level up,” meaning the user’s character advances to a higher level, becomes more powerful, and gains access to new talents and equipment.⁷⁴

237. In Minecraft Bedrock, when a user completes a specific action or task, they receive an achievement or trophy. The achievement is then logged in the player’s Minecraft account. Most achievements provide in-game rewards such as creator items or emotes when unlocked.

238. Not all advancements and achievements are equally easy to obtain. Instead, Microsoft and Mojang have intentionally created advancements and achievements that incentivize many hours and/or days of gameplay. By way of example, Microsoft and Mojang chose to reward players for playing Minecraft for 100 days, playing underwater for 10 minutes, building maps from pieces hidden throughout the game, trading 1,000 emeralds, collecting a surplus of resources, and more. These achievements can take countless hours across many days to unlock due to the complexity and/or time-consuming nature of the steps needed to unlock the achievement.

239. This reward system creates addictive engagement and encourages players to continue gameplay.

⁷³ *Advancement*, Minecraft Wiki, <https://minecraft.fandom.com/wiki/Advancement> (last visited July 24, 2025).

⁷⁴ *How to Earn Experience Points & Level Up in Minecraft*, (Jan. 24, 2022), <https://www.dummies.com/article/home-auto-hobbies/games/online-games/minecraft/how-to-earn-experience-points-and-level-up-210066/>.

1 240. Many items within Minecraft are statistically more or less difficult to find based upon
2 the item's rarity. Upon information and belief, Microsoft and Mojang intentionally include algorithms
3 that randomize the possibility of finding specific items within the game, and can adjust those
4 algorithms at any time. Microsoft and Mojang can and do manipulate the odds that a user will be able
5 to locate a desired item, thereby artificially increasing the amount of time a player must spend in-
6 game to obtain that item, regardless of the player's skill level. Microsoft and Mojang use these
7 algorithms and features to make the game more difficult, as players cannot automatically locate many
8 in-game items. This creates further addictive engagement and increases gameplay as players search
9 for what they need.

10 241. Microsoft and Mojang knew that its Minecraft Product contained an inherent risk of
11 abuse, addiction, and compulsive use by minors and the harms that arise therefrom, but instead of
12 disclosing such harms Microsoft and Mojang marketed and misrepresented Minecraft as
13 "educational" and safe for use by minors.

14 242. The use of operant conditioning, a lack of warnings about the harms of use, no option
15 for self-imposed limits on playtime, an achievement system that rewards prolonged and repeated
16 gaming sessions, and other features described herein are all examples of Microsoft and Mojang
17 designing Minecraft with harmful psychological tactics to take advantage of the chemical reward
18 system of a user's brain (especially a minor or neurodivergent person) to create addictive
19 engagement, despite Microsoft and Mojang's knowledge that abuse and compulsive use of its
20 Product by foreseeable users, *i.e.*, minors and neurodivergent individuals, can and did lead to users,
21 including Plaintiff Thomas K. Litton, suffering from impacts on brain function, addiction,
22 withdrawal symptoms, negative consequences on cognitive processes, and other injuries. Microsoft
23 and Mojang marketed and misrepresented Minecraft as safe for all ages without warning of said
24 risk of injury and addictive design, ultimately helping create and foster an epidemic of video game
25 addiction in minors.

26 ///

27 ///

28 ///

IX. Microsoft's Xbox and Xbox Products

A. Xbox Product Basics

243. Xbox is a video gaming brand, owned and operated by Microsoft, which consists of Xbox gaming consoles, as well as online video gaming through the Xbox network, Xbox Game Pass, and Xbox Cloud Gaming.

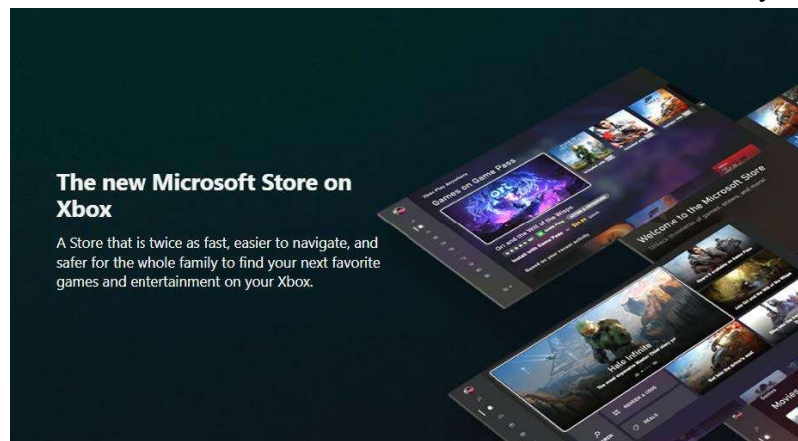

244. Each version of the Xbox console provides users with the ability to play video games using a hard copy of the video game, a digital copy downloaded from the Microsoft Store (also known as Xbox Games Store, hereinafter “Xbox Store”), using the Xbox Network (formerly known as Xbox Live), and/or using Xbox Game Pass or Cloud Gaming.

245. Microsoft developed and maintains the Xbox Store – a product-platform through which users can purchase thousands of games to be stored on their console through digital download, and for use with its Xbox consoles.

246. Though third parties create many of the games available in the Xbox Store, Microsoft profits from all monetary transactions that occur within the store, taking thirty percent of revenue from sales of third-party console games.⁷⁵

247. Likewise, Microsoft profits from all monetary transactions that occur within the third-party games played on its Xbox Platform.

248. Microsoft markets the Xbox Store as “safer for the whole family” to use:

⁷⁵ Tom Warren, *Microsoft Explored Reducing its Xbox Store Cut to Shake Up Console Gaming*, The Verge (Mar. 2, 2021), <https://www.theverge.com/2021/5/2/22415712/microsoft-xbox-store-cut-epic-games-court-documents>.

249. Microsoft also touts that:

- a. “Xbox strives to create a safer gaming experience for you and your family.”⁷⁶
- b. “[Xbox holds itself] accountable for making our platforms as safe as possible for all players.”⁷⁷
- c. “[Xbox] will promote the availability of our safety tools through our platforms, support channels, services, on our websites and in retail stores to reach more players and parents.”⁷⁸

250. The Xbox Network is an online multiplayer gaming service created and operated by Microsoft for use with its Xbox consoles. The Xbox Network includes the Xbox Store and Xbox Cloud Gaming.

251. Xbox Cloud Gaming or Game Pass is operated by linking a device, either a console, tablet, phone, or computer, to a remote server in the cloud. Gameplay is saved in the cloud and can be accessed and used from numerous devices at any given location. Thousands of games are available in the Xbox Cloud Gaming and Xbox Network library, including Roblox, Fortnite, and Minecraft.

B. Microsoft Employs a Game-Like Achievement System On Its Platforms that Causes and/or Exacerbates Compulsive Game Use.

252. Microsoft knows that games targeted to minors – such as Roblox, Fortnite, and Minecraft – are available on its Xbox Platform. Microsoft is therefore aware that minors and those who are susceptible to addiction are using its Xbox Platform. Nonetheless, Microsoft chose to add features to its Xbox Platform that intentionally addict such users.

⁷⁶ *Family-Friendly Gaming for Everyone*, Xbox, <https://www.xbox.com/en-US/family-hub#:~:text=FAMILY%2DFRIENDLY%20GAMING%20FOR%20EVERYONE&text=Xbox%20strives%20to%20create%20a,Windows%2C%20and%20Xbox%20mobile%20apps> (last visited July 24, 2025).

⁷⁷ Dave McCarthy, *Our Shared Commitment to Safer Gaming*, Xbox, Dec. 14, 2020, <https://www.xbox.com/en-US/family-hub/safety-principles>.

⁷⁸ *Id.*

1 253. Microsoft actively employs or has employed psychologists and neuroscientists within
2 its Xbox User Research and Xbox Player Experiences & Platform departments.⁷⁹

3 254. Upon information and belief, through the use of such psychologists and
4 neuroscientists, Microsoft developed and implemented design features to keep users compulsively
5 and addictively engaged with its platform, despite its knowledge that abuse, addiction, and
6 compulsive use by minors can lead to impacts on brain function and injury, including but not limited
7 to dissociative behavior, withdrawal symptoms, social isolation, negative consequences on
8 cognitive processes, and other harmful effects.

9 255. For example, within its Xbox Products, Microsoft developed and implemented a
10 program called the Xbox achievement system (“Xbox achievements” or “achievements”). Xbox
11 achievements is a game-like program that tracks the amount of time a player spends in games on
12 the Xbox platform and the player’s actions within those games.

13 256. Microsoft encourages game developers to use its achievement system by creating tasks
14 for players to accomplish within their respective games.

15 257. Microsoft makes available to all users the achievements that are available within the
16 games they are playing.

17 258. Many of the achievements created within Microsoft’s achievement system are met by
18 players spending excessive time in-game. For example, a player can earn the Minecraft “Passing
19 the Time” achievement by playing Minecraft on Xbox for 100 days. Likewise, Roblox
20 achievements include “Marathon” for playing Roblox for an hour, “3 Day Roll” for playing Roblox
21 three days in a row, “10 Day Roll” for playing Roblox ten days in a row, and “20 Day Roll” for
22 playing Roblox 20 days in a row. Similarly, Fortnite includes the “Talented Builder” achievement
23 for building 500,000 structures within the game.

24
25
26 ⁷⁹ See Deborah Hendersen, LINKEDIN, <https://www.linkedin.com/in/deborahjohendersen> (last
27 visited July 24, 2025); Todd Kelley, LINKEDIN, <https://www.linkedin.com/in/toddakelley> (last
28 visited July 24, 2025); Carolina Labbé, LINKEDIN, <https://cl.linkedin.com/in/carolinalabbe> (last
visited July 24, 2025); Emily Joseph, LINKEDIN, https://www.linkedin.com/in/emilymjoseph1?trk=public_post_feed-actor-name (last July 24, 2025).

259. Within each user's Xbox profile, an "achievements" tab displays each game where the user has obtained an achievement. Within the achievements tab, each game shows the percentage of other players who have unlocked the same achievement, and the date it was unlocked:

260. If a user has their Xbox Platform on, but fails to engage with it for a length of time, Microsoft displays a screensaver that highlights a user's progress in unlocking achievements within a third-party's game.

261. When these achievements are earned, *Microsoft* – not the third-party games – notifies the player with a console based – not game based – message. This console-based message is akin to the lights and sounds of a slot machine in a casino. Microsoft plays a reward-signifying noise and displays a bright message on the screen highlighting the player's accomplishment:

262. Xbox achievements are categorized as either standard achievements or rare achievements. When a rare achievement is unlocked, the graphic displayed on the user's screen in-

1 game indicates that the achievement is rare. A rare achievement is one that less than 10% of users
2 have unlocked.

3 263. In addition to such messages, Microsoft awards players a “Gamerscore” for each
4 achievement earned. In game-like fashion, Microsoft tabulates each player’s Gamerscore for the
5 achievements earned across all games played on the Xbox platform and displays that score for all
6 other users to see.

7 264. While Xbox achievements earned and a player’s Gamerscore can be an indication to
8 other users and friends about how much and how well a user has played, Microsoft’s purpose for
9 implementing Xbox achievements goes beyond the social aspects of gaming. Rather, Microsoft
10 created the Xbox achievement system in order to incentivize extended and continued gameplay on
11 its platform, resulting in more purchases of in-game or of third-party games, all of which increase
12 Microsoft’s profits.

13 265. Microsoft’s Platform does not contain any warnings about the general harmful nature
14 of its achievement system or general gaming addiction. At account setup, the Xbox website contains
15 no warnings labels, banners, or messaging informing minor users of the known risks and harms
16 stemming from the use of the Xbox platform. Users are not provided with information regarding
17 potential physical and mental harm associated with use of the platform, including stress, aggressive
18 behavior, verbal memory deficiency, depression, lowered cognitive abilities, sleeping disorders,
19 anxiety, and behavioral addiction disorders at account setup or at any time during usage. Users are
20 not provided with information regarding potential physical and mental harm associated with the use
21 of its platform.

22 266. Microsoft could, but chooses not to, provide warnings about the harms of use of its
23 platform without any changes to the achievement system or the content of the achievements.

24 267. Microsoft could, but chooses not to, implement user protections or safeguards, such
25 as user-imposed time limits on gameplay, increased age verification at account setup, and automatic
26 parental controls imposed when a minor creates an Xbox account.

27 ///

28 ///

1 **C. Microsoft's Xbox Products Do Not Include Adequate Parental Controls**

2 268. To make an Xbox profile, users must first create a Microsoft account, or link to a pre-
3 existing Microsoft account.

4 269. If a user already has a Microsoft account, no age verification is required to create an
5 Xbox profile.

6 270. Most parental controls are not automatically applied to a minor's Xbox profile upon
7 creation. A parent or guardian can only implement parental controls by accessing the console itself
8 and adjusting settings to apply controls, by logging into the Xbox profile wherein they want to
9 impose parental controls, or by connecting their child's account to their own Microsoft profile. To
10 engage with/change any parental control settings, the parent must first know the account exists, and
11 subsequently know the child's gamertag information to implement controls on their minor's
12 account.

13 271. Microsoft could, but chooses not to, automatically implement all parental controls on
14 minors' Xbox profiles upon creation.

15 272. The use of operant conditioning, a lack of warnings about the harms of use, an
16 achievement system that rewards prolonged and repeated gaming sessions, and other features
17 described herein are all examples of Microsoft designing Xbox Products with harmful
18 psychological tactics to take advantage of the chemical reward system of a user's brain (especially
19 a minor or neurodivergent person) to create addictive engagement, despite Microsoft's knowledge
20 that abuse and compulsive use of its Product by foreseeable users, *i.e.*, minors and neurodivergent
21 individuals, can and did lead to users, including Plaintiff Thomas K. Litton, suffering impacts on
22 brain function, addiction, withdrawal symptoms, negative consequences on cognitive processes,
23 and other injuries. Microsoft marketed and misrepresented Xbox Products as safe for all ages
24 without warning of said risk of injury and addictive design, ultimately helping create and foster an
25 epidemic of video game addiction in minors.

26 **PLAINTIFF-SPECIFIC ALLEGATIONS**

27 273. Thomas K. Litton's gaming addiction is a substantial factor in the decline of Thomas
28 K. Litton's academic performance.

274. Thomas K. Litton's gaming addiction is a substantial factor in the necessity of Thomas K. Litton's care that includes diagnostic testing and an Individualized Education Plan ("IEP") at school.

275. Plaintiff Thomas K. Litton's usage of Defendants' Products is compulsive and disordered, and he is incapable of restraining their own usage, as are the people around them. Any attempt to remove Thomas K. Litton from his games is met with severe withdrawal symptoms including anger, injurious behavior to himself and others, threats of self-harm, and refusal to maintain hygiene or sleep.

276. Plaintiff Thomas K. Litton has been injured and harmed as a direct and proximate result of each Defendant's actions and misconduct, and for that he is entitled to compensation and other damages under California law.

277. Each Defendant has engaged in deceptive, unfair, immoral, and reckless behavior that damaged and continues to harm Plaintiff Thomas K. Litton and countless other Californians and Americans. For this, they should be punished, and punitive damages should be assessed against each Defendant for their respective misdeeds and unlawful conduct.

278. Thomas K. Litton never agreed to be harmed or exposed to an addictive Product. Plaintiff Thomas K. Litton also never entered into a contract with any of the Defendants, and/or to the extent that any Defendant claims a contract exists with Thomas K. Litton, Thomas K. Litton expressly disaffirms said alleged contact.

PLAINTIFF'S CLAIMS

COUNT I – STRICT PRODUCT LIABILITY – DESIGN DEFECT

(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity as a manufacturer of Minecraft, and DOES 1-50)

279. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

280. At all relevant times, each Defendant was engaged in the business of designing, developing, managing, operating, testing, producing, manufacturing, labeling, marketing, advertising, promoting, controlling, supplying, leasing, selling, and/or otherwise distributing their

1 respective video game Products used by Thomas K. Litton, each of which are defective and
2 unreasonably dangerous.

3 281. The video game Products that each Defendant placed into the stream of commerce
4 were defectively designed. The Products were designed to cause addictive and compulsive use,
5 including by minors. The Products are not reasonably fit, suitable, or safe for their intended purpose.

6 282. The defective conditions of Roblox, Fortnite, and Minecraft rendered them
7 unreasonably dangerous and/or not reasonably safe. The foreseeable risks outweigh the benefits
8 associated with Defendants' designs.

9 283. The defects in each Defendant's respective designs were present in the Products when
10 the Products left the hands of Defendants and when they were released to the general public to be
11 used in an intended and foreseeable manner.

12 284. Roblox, Fortnite, and Minecraft, as designed, were unreasonably dangerous, posed a
13 substantial likelihood of harm, and were therefore defective because of the reasons enumerated in
14 this Complaint, including, but not limited to, each Product's design including addictive operant
15 conditioning, each Product's design lacking warnings about the risk of addiction, each Product's
16 design lacking safeguards such as user-imposed time restrictions on gameplay, each Product's
17 design lacking proper minor age verification, and each Product failing to operate as a reasonable
18 user would expect.

19 285. Each Defendant designed its Products to be addictive and take advantage of the
20 chemical reward system of users' brains to establish compulsive use and addiction.

21 286. Each Defendant's respective Products were expected to and did reach Plaintiff
22 Thomas K. Litton without substantial change in the condition in which they were designed,
23 manufactured, labeled, marketed, promoted, supplied, and otherwise released into the stream of
24 commerce.

25 287. Thomas K. Litton used Defendants' Products, Roblox, Fortnite, and Minecraft, in an
26 intended and reasonably foreseeable manner, and the Products were not materially altered prior to
27 their use.
28

1 288. Each Defendant knew or, by the exercise of reasonable care, should have known that
2 minors, including Thomas K. Litton, would use the Products without anyone inspecting the
3 Products for addictive or other dangerous features.

4 289. Reasonable users of Defendants' respective Products would not expect, and Plaintiff
5 Thomas K. Litton herein did not expect, that said Products would pose risks of severe physical and
6 mental harm.

7 290. Reasonable users of Defendants' Products would not expect that Defendants knew
8 about risks of severe physical and mental harm and nevertheless chose to place their Products into
9 the stream of commerce.

10 291. Each Defendant could have utilized cost effective, reasonably feasible alternative
11 designs to minimize these harms, such as by designing their respective Products without the harm-
12 causing features listed above, while still providing an optimal gaming experience.

13 292. At the time each Defendant's Products were designed, developed, distributed to
14 Thomas K. Litton, and played, safer alternative designs existed that were entirely feasible.

15 293. Each Defendant could have utilized cost effective, reasonably feasible alternative
16 designs to minimize harm caused by their respective Products by implementing elements that
17 include, but are not limited to:

- 18 a. Robust age verification;
- 19 b. Effective parental controls;
- 20 c. The removal of barriers to the enactment of parental controls;
- 21 d. Warnings of health effects of use and extended use upon sign-up;
- 22 e. Opt-in restrictions to the length and frequency of sessions;
- 23 f. Self-limiting tools, including but not limited to session time notifications,
24 warnings, or reports.
- 25 g. Tools to restrict and/or block usage during certain times of day (such as during
26 school hours or late at night);
- 27 h. Self-imposed limits for microtransactions; and
- 28 i. Others as set forth herein.

294. Instead, each Defendant designed their respective Products to aggressively addict users with features that increase use time, frequency of use, and profit to each Defendant, all to the detriment of users' wellbeing.

295. Each Defendant's respective defective Product, and Thomas K. Litton's use of each Defendant's Product, was the direct and proximate cause of Thomas K. Litton's injuries and harm that include, but are not limited to, impacts on brain function, psychological injury, emotional distress, diminished social interactions, lack of interest in other hobbies, and withdrawal symptoms such as rage, anger, and physical outbursts.

296. Plaintiff Thomas K. Litton's injuries—physical, emotional, and economic—were reasonably foreseeable to each Defendant at the time of the Products' design, marketing, distribution, and operation.

297. As a direct and proximate result of each Defendant's defective products, Plaintiff Thomas K. Litton suffered significant injury, harm, damages, and economic loss, and will continue to suffer such harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the future.

298. Each Defendant's actions and omissions as alleged in this Complaint were intentional, oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT II – STRICT PRODUCT LIABILITY – FAILURE TO WARN

(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity as a manufacturer of Minecraft, and DOES 1-50)

299. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

300. At all relevant times, each Defendant was engaged in the business of designing, developing, managing, operating, testing, producing, manufacturing, labeling, marketing, advertising, promoting, controlling, supplying, leasing, selling, and/or otherwise distributing their

1 respective video game Products used by Thomas K. Litton, each of which are defective and
2 unreasonably dangerous.

3 301. Each Defendant knew that their respective Products are and were harmful, capable of
4 causing and in fact were designed to cause compulsive, addictive use, particularly in minors, and
5 that such use could result in severe physical, mental, and emotional injuries.

6 302. Each Defendant knew, or should have known, that ordinary consumers such as
7 Plaintiff Thomas K. Litton would not have realized the potential risks of their respective Products.

8 303. Each Defendant knew, or should have known, that the use of Roblox, Fortnite, and
9 Minecraft was dangerous, harmful, and injurious when used by Plaintiff Thomas K. Litton in a
10 reasonably foreseeable manner.

11 304. Each Defendant owed a duty to warn consumers of the foreseeable risks and dangers
12 of their respective Products that Defendants knew were present, but were not obvious or known to
13 users, especially underage users, or their caregivers, or any average member of the consuming
14 public.

15 305. At the time Defendants' respective Products left each Defendant's control, they did
16 not include – nor have they ever included – warnings that the Products pose an unreasonable risk
17 of harm to users, particularly minors.

18 306. Each Defendant failed to provide timely and adequate warnings, instructions, and
19 information by, including but not limited to:

- 20 a. failing to ensure the Products included warnings regarding their addictive
21 design that were accurate, conspicuous, and adequate, despite having
22 extensive knowledge of the risks associated with their use;
- 23 b. failing to conduct adequate pre-and-post-market safety testing such that an
24 adequate warning could have been issued to users;
- 25 c. failing to include adequate and conspicuous warnings that would alert users
26 to the dangerous risks of the Products, including but not limited to the risks
27 of causing severe and life-altering physical, mental, and emotional disorders
28 and behaviors in minors, especially those with neurodivergent qualities;

- d. failed to issue warnings to consumers regarding the dangerous risks of the Products even after the sale and/or download of their Products; and
- e. representing that the Products were and are safe for use, when in fact, Defendants knew or should have known that their Products were designed to cause minors to engage in excessive use until they developed an addiction or disordered compulsion to use the Products.

307. Moreover, each Defendant breached its respective duty of care owed to Plaintiff Thomas K. Litton through their non-feasance, failure to act, and omissions in the development, setup, management, maintenance, operation, marketing, advertising, promotion, supervision, and control of their respective Products. Those breaches include but are not limited to:

- a. designing the Products to be more addictive and to target specific individuals based on information obtained and retained by Defendants and/or third-parties;
- b. failing to implement effective parental controls;
- c. failing to implement reasonably available means for users or their parents to monitor for and limit or deter their own excessive frequency or duration of use of Products, including patterns, frequency, or duration of use that are indicative of addiction, compulsive use, or overuse;
- d. failing to implement reasonably available means to monitor for and limit or deter excessive overspending by minors on in-game downloadable Products and upgrades and in-game purchases and/or microtransactions; and
- e. failing to implement reasonably available means to allow users or their parents to limit or deter use of Products by minors during ordinary times for school or sleep.

308. Each Defendant's failure to adequately warn about its defective Product created a danger of injuries described herein that were reasonably foreseeable at the time of the design, development, and dissemination of the Product.

309. A reasonable company under the same or similar circumstances would have warned and instructed Plaintiff Thomas K. Litton of the dangers of its Product.

310. Had Plaintiff Thomas K. Litton been aware that the Products could cause significant harm such as impacts on brain function, psychological injury, aggressive behavior, verbal memory deficiency, depression, lowered cognitive abilities, sleeping disorders, anxiety, and behavioral addiction disorders, Thomas K. Litton would not have used or continued to use each Defendant's respective Product. Alternatively, if Defendants had adequately warned or instructed Thomas K. Litton, he would have taken precautions when using each Defendant's respective Product in order to eliminate or mitigate the risk of harm.

311. The addictive nature of each Defendant's defective Product and failure to warn about said Products was a substantial factor in Plaintiff Thomas K. Litton's significant injury, harm, damages, and economic loss. Plaintiff Thomas K. Litton will continue to suffer such harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the future.

312. Each Defendant's actions and omissions as alleged in this Complaint were intentional, oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT III – NEGLIGENCE – DESIGN

(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity as a manufacturer of Minecraft, and DOES 1-50)

313. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

314. At all relevant times, each Defendant was engaged in the business of designing, developing, managing, operating, testing, producing, manufacturing, labeling, marketing, advertising, promoting, controlling, supplying, leasing, selling, and/or otherwise distributing their respective video game Products used by Thomas K. Litton, each of which are defective and unreasonably dangerous.

1 315. Each Defendant knew, or should have known, that the use of Roblox, Fortnite, and
2 Minecraft was dangerous, harmful, and injurious when used by Plaintiff Thomas K. Litton in a
3 reasonably foreseeable manner.

4 316. Each Defendant knew, or should have known, that ordinary consumers such as
5 Plaintiff Thomas K. Litton would not have realized the potential risks and dangers of Roblox,
6 Fortnite, and Minecraft.

7 317. Each Defendant owed a duty to all reasonably foreseeable users to design a safe
8 Product.

9 318. Roblox, Fortnite, and Minecraft, as designed, were unreasonably dangerous, posed a
10 substantial likelihood of harm, and were therefore defective because of the reasons enumerated in
11 this Complaint, including, but not limited to, each Product's design including addictive operant
12 conditioning, each Product's design lacking warnings about the risk of addiction, each Product's
13 design lacking safeguards such as user-imposed time restrictions on gameplay, each Product's
14 design lacking proper minor age verification, and each Product failing to operate as a reasonable
15 user would expect.

16 319. Each Defendant breached their duty by failing to use reasonable care in the design of
17 their respective Products by negligently designing Roblox, Fortnite, and Minecraft to specifically
18 appeal to and to take advantage of minors, who were particularly unable to appreciate the risks of
19 the Products.

20 320. Each Defendant breached their duty by failing to use cost effective, reasonably
21 feasible alternative designs that would make their respective Products less addictive and harmful to
22 minors, including but not limited to:

- 23 a. Robust age verification;
- 24 b. Effective parental controls;
- 25 c. The removal of barriers to the enactment of parental controls;
- 26 d. Warnings of health effects of use and extended use upon sign-up;
- 27 e. Opt-in restrictions to the length and frequency of sessions;
- 28

- f. Self-limiting tools, including but not limited to session time notifications, warnings, or reports.
- g. Tools to restrict and/or block usage during certain times of day (such as during school hours or late at night);
- h. Self-imposed limits for microtransactions; and
- i. Others as set forth herein.

321. Instead, each Defendant designed their respective Products to aggressively addict users with features that increase use time, frequency of use, and profit to each Defendant, all to the detriment of users' wellbeing

322. A reasonable company under the same or similar circumstances would have designed a safer product.

323. Plaintiff was harmed directly and proximately by each Defendant's failure to use reasonable care in the design of its Product.

324. As a direct and proximate result of each Defendant's negligence, Plaintiff Thomas K. Litton suffered significant injury, harm, damages, and economic loss, and will continue to suffer such harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the future.

325. Each Defendant's actions and omissions as alleged in this Complaint were intentional, oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT IV – NEGLIGENCE – FAILURE TO WARN

(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity as a manufacturer of Minecraft, and DOES 1-50)

326. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

327. At all relevant times, each Defendant was engaged in the business of designing, developing, managing, operating, testing, producing, manufacturing, labeling, marketing,

1 advertising, promoting, controlling, supplying, leasing, selling, and/or otherwise distributing their
2 respective video game Products used by Thomas K. Litton, each of which are defective and
3 unreasonably dangerous.

4 328. Defendants knew, or should have known, that the use of their respective Products was
5 dangerous, harmful, and injurious when used by Plaintiff Thomas K. Litton in a reasonably
6 foreseeable manner.

7 329. Each Defendant knew or, by the exercise of reasonable care, should have known that
8 its respective Products posed risks of harm to youth. These risks were known and knowable
9 considering each Defendant's own internal information and knowledge regarding its Product at the
10 time of the Product's development, design, marketing, promotion, advertising, and distribution to
11 Thomas K. Litton.

12 330. Each Defendant knew, or should have known, that ordinary consumers such as
13 Plaintiff Thomas K. Litton would not have realized the potential risks and dangers of Defendants'
14 respective Products.

15 331. At the time each Defendant's Product left their respective control, the Products did not
16 include – nor has they ever included – warnings that the Products pose an unreasonable risk of harm
17 to users, particularly minors.

18 332. Had Plaintiff Thomas K. Litton been aware that the Products could cause significant
19 harm such as impacts on brain function, psychological injury, aggressive behavior, verbal memory
20 deficiency, depression, lowered cognitive abilities, sleeping disorders, anxiety, and behavioral
21 addiction disorders, Thomas K. Litton would not have used or continued to use each Defendant's
22 Product. Alternatively, if Defendants had adequately warned or instructed Thomas K. Litton, he
23 would have taken precautions when using each Defendant's respective Product in order to eliminate
24 or mitigate the risk of harm.

25 333. Each Defendant had a duty to give reasonable and adequate warning of dangers
26 inherent or reasonably foreseeable in the use of its Product in a manner which the manufacturer
27 should reasonably foresee.
28

334. Each Defendant breached their duty owed to foreseeable users. That breach includes a failure to warn users that Defendants' respective Products cause addiction, compulsive use, and/or other physical and mental injuries.

335. A reasonable company under the same or similar circumstances would have used reasonable care to provide adequate warnings to consumers, and parents of minor consumers.

336. As a direct and proximate result of each Defendant's breach of duty to provide adequate warnings, Plaintiff Thomas K. Litton was harmed and sustained the injuries set forth herein.

337. As a direct and proximate result of each Defendant's negligence, Plaintiff Thomas K. Litton suffered significant injury, harm, damages, and economic loss, and will continue to suffer such harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the future.

338. Each Defendant's actions and omissions as alleged in this Complaint were intentional, oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT V – NEGLIGENCE – ORDINARY

(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity as a manufacturer of Minecraft, and DOES 1-50)

339. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

340. Each Defendant had a duty to exercise reasonable care and caution for the safety of individuals using their respective Products, including Thomas K. Litton.

341. Each Defendant, in its role as product designer, developer, manufacturer, marketer, and seller, and otherwise engaging in activity culminating in placing their respective Products into the stream of commerce, owed a duty to exercise ordinary care in designing and placing the Products into the stream of commerce.

1 342. Each Defendant also owed a duty to warn users of the hazards of using their respective
2 Products, which each Defendant knew were present in their respective Products, though such
3 hazards were not obvious to users and particularly not so to minor users.

4 343. Each Defendant's duties also include a duty to exercise ordinary care and act as a
5 reasonably careful company would under the circumstances.

6 344. Each Defendant created harmful and addictive Products and failed to engage in the
7 development of safer alternative designs.

8 345. For their own profit, each Defendant chose not to engage in the development of safer
9 alternative designs.

10 346. Each Defendant was negligent, reckless, and/or careless in failing to exercise ordinary
11 care.

12 347. Each Defendant's failure to act in developing a safer alternative design constitutes a
13 breach of their duty of reasonable care.

14 348. Each Defendant knew, or should have known, that their Products are harmful, capable
15 of causing extensive physical, mental, emotional, and financial or economic harm and damage, and
16 that minor users are developing disordered and addicted use.

17 349. Defendants were and are negligent in failing to provide adequate warnings about the
18 dangers associated with using their Products and in failing to warn users, and the parents of users
19 who are minors, including Thomas K. Litton, about how and when, if ever, to safely use their
20 Products.

21 350. Each Defendant was and is negligent in failing to provide users, and their caregivers
22 in the case of users who are minors, including Thomas K. Litton, the tools to ensure that their
23 respective Products are used in a limited and safe manner.

24 351. As a result of each Defendant's breach of the herein identified duties and resulting
25 negligence, Plaintiff Thomas K. Litton suffered severe physical and mental harm, as well as
26 economic damages, from Plaintiff's use of Defendants' respective Products.

27 352. Each Defendant's breach of duty of care to Plaintiff Thomas K. Litton was a
28 substantial factor in causing harm to Plaintiff and is the actual and proximate cause of said harm.

353. As a direct and proximate result of each Defendant's negligence, Plaintiff Thomas K. Litton suffered significant injury, harm, damages, and economic loss, and will continue to suffer such harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the future.

354. Each Defendant's actions and omissions as alleged in this Complaint were intentional, oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT VI – STATUTORY NEGLIGENCE

(Cal. Civ. Code § 1714)

(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity as a manufacturer of Minecraft, and DOES 1-50)

355. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

356. Each Defendant had a duty to exercise ordinary care and caution for the safety of individuals using their Products, including Thomas K. Litton.

357. Each Defendant, in their role as product designers, developers, manufacturers, marketers, and sellers, and otherwise engaged in activity culminating in placing their Products into the stream of commerce, owed a duty to exercise ordinary care and act as a reasonably careful company would under the circumstances.

358. Each Defendant owed a duty to avoid engaging in conduct they knew, or reasonably should have known, would cause injury to their users, including Plaintiff Thomas K. Litton.

359. Each Defendant breached those duties.

360. Each Defendant negligently, recklessly, and/or carelessly created a harmful and addictive Product and failed to engage in the development of a safer alternative design.

361. Each Defendant knew, or should have known, that their respective Products are harmful, capable of causing extensive physical, mental, emotional, and financial or economic harm and damage, and that minor users are developing disordered and addicted use.

362. Each Defendant was and is negligent in failing to provide adequate warnings about the dangers associated with using their respective Products and in failing to warn users, and the parents of users who are minors, including Thomas K. Litton, about how and when, if ever, to safely use their Products.

363. Each Defendant was and is negligent in failing to adequately provide users, and their caregivers in the case of users who are minors, including Thomas K. Litton, with the tools to ensure that their respective Products are used in a limited and safe manner.

364. As a result of each Defendant's breach of the herein identified duties and resulting negligence, Plaintiff Thomas K. Litton suffered severe physical and mental harm, as well as economic damages, from Plaintiff's use of Defendants' respective Products.

365. Each Defendant's breach of duty of care to Plaintiff Thomas K. Litton was a substantial factor in causing harm to Plaintiff and is the actual and proximate cause of said harm.

366. As a direct and proximate result of each Defendant's negligence, Plaintiff Thomas K. Litton suffered significant injury, harm, damages, and economic loss, and will continue to suffer such harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the future.

367. Each Defendant's actions and omissions as alleged in this Complaint were intentional, oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT VII – INTENTIONAL MISREPRESENTATION

(Cal. Civ. Code § 1710(1))

(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity as a manufacturer of Minecraft, and DOES 1-50)

368. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

369. At all relevant times, each Defendant was engaged in the business of designing, developing, managing, operating, testing, producing, manufacturing, labeling, marketing,

1 advertising, promoting, controlling, supplying, leasing, selling, and/or otherwise distributing their
2 respective video game Products used by Thomas K. Litton, each of which are defective and
3 unreasonably dangerous.

4 370. As detailed herein, each Defendant knew about the defective conditions of their
5 respective Products and that the Products posed serious health risks to users, particularly minors.

6 371. Each Defendant designed their respective product with addictive psychological
7 features to keep users playing more often and for longer periods of time, while knowing that abuse
8 and compulsive use by youth can lead to injury, but concealed this information from the public and
9 Product users, including Plaintiff Thomas K. Litton.

10 372. Each Defendant knew of the risks associated with the use of their respective Products
11 based on internal research and external studies known within the industry.

12 373. Each Defendant could have disclosed the defective condition of their respective
13 Products to the public and could have advised that the Products posed serious health risks to users,
14 particularly youth. No Defendant took such action; instead, each Defendant opted to omit the safety
15 risks from any disclosures of marketing practices.

16 374. Each Defendant knowingly and intentionally misrepresented that their respective
17 Products were safe for use, and safe as educational tools, to further entice users to continue engaging
18 with their respective Products, including Plaintiff Thomas K. Litton, while simultaneously knowing
19 that their respective Products each caused addiction and compulsive use.

20 375. Defendant Roblox Corp. stated that it has “built a platform with safety at the
21 foundation,” that it has a “commitment to safety and civility,” and that it consulted “child
22 development experts” and “examined global industry standards” when creating recommendations
23 for its Product. Further, Roblox Corp. stated that “safety is and always has been foundational to
24 everything [it does] at Roblox,” that “[s]afety underpins everything [it does] at Roblox, particularly
25 the safety of [its] youngest users,” and finally that it “spend[s] hundreds of millions of dollars each
26 year to meet [its] safety mission.”

27 376. Defendant Epic Games stated that it wants its Product to be a “safe place for [users]”
28 and that its Product is educational and safe for use in classrooms. Defendant Epic Games also states

1 that it wants to “be on the forefront of creating fun and safe games and experiences for people of
2 all ages.”

3 377. Defendants Microsoft and Mojang stated that they will “hold [them]selves
4 accountable for making Minecraft as safe as possible for everyone.” Defendants Microsoft and
5 Mojang further state that it is “so important that [their] games are a safe and welcoming place for
6 all players,” that “player safety is a priority for Mojang to ensure everyone feels safe,” and that their
7 “community standards help [them] build a community that is open and safe for everyone.”

8 378. Each Defendant’s statements about the safety of their respective Products are false and
9 misleading, and each Defendant’s omission of the potential harm caused by Defendants’ respective
10 Products is misleading and deceitful.

11 379. Each Defendant intended for users, including Plaintiff Thomas K. Litton, to rely on
12 their representations that their respective Products were safe for use to keep users engaging with
13 their Products and increase their profits, and purposefully marketed their Products to minors for
14 that reason.

15 380. However, each Defendant had no reasonable grounds to believe that their respective
16 Products were safe given the internal and external research on addiction associated with video game
17 use and given the global recognition of video game addiction. Each Defendant knowingly made
18 false statements about the safety of their respective Products.

19 381. Each Defendant failed to disclose to users, including Plaintiff Thomas K. Litton, that
20 their Products are designed to create and sustain addiction.

21 382. Each Defendant intentionally failed to disclose to users the strategies and features
22 designed and employed in their Products to create and sustain addiction.

23 383. Each Defendant intentionally failed to disclose their addictive strategies and features
24 to entice users to continue gameplay and increase profits.

25 384. If each Defendant had not concealed, omitted, and misrepresented facts regarding the
26 safety of their Products, and had Plaintiff Thomas K. Litton been aware that the Products could
27 cause significant harm such as impacts on brain function, psychological injury, aggressive behavior,
28 verbal memory deficiency, depression, lowered cognitive abilities, sleeping disorders, anxiety, and

1 behavioral addiction disorders, Thomas K. Litton would not have used or continued to use
2 Defendants' Products. Alternatively, if Defendants had adequately warned or instructed Thomas K.
3 Litton, he would have taken precautions when using each Defendant's respective Product in order
4 to eliminate or mitigate the risk of harm.

5 385. Plaintiff Thomas K. Litton was unaware of the dangerous and addictive nature of
6 Defendants' respective Products. Plaintiff reasonably relied on each Defendant's representations
7 that its respective Product was safe for use, particularly for minors.

8 386. Plaintiff Thomas K. Litton reasonably relied on each Defendant's representations and
9 did not know, nor had any way of knowing, about the misrepresentations about Defendants'
10 respective Products.

11 387. A reasonable person, including Plaintiff Thomas K. Litton, would find information
12 that impacted the users' health, safety, and well-being – such as the serious adverse health risks
13 associated with the use of Defendants' Products – to be important when deciding whether to
14 purchase, download, use, or to continue to use, those Products. Thus, Plaintiff Thomas K. Litton
15 justifiably relied on each Defendant's misrepresentations that the Products were safe when
16 purchasing, downloading, playing, continuing to use, and/or purchasing downloadable game
17 content.

18 388. Because of Plaintiff Thomas K. Litton's reasonable reliance on each Defendant's
19 representations, Plaintiff sustained physical and psychological harm, as well as economic damages.

20 389. As a direct and proximate result of each Defendant's material misrepresentations and
21 false statements, Plaintiff Thomas K. Litton suffered significant injury, harm, damages, and
22 economic loss, and will continue to suffer such harm, damages, and economic loss in the future.
23 Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the
24 future.

25 390. Each Defendant's actions and omissions as alleged in this Complaint were intentional,
26 oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without
27 regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of
28 punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT VIII – NEGLIGENT MISREPRESENTATION

(Cal. Civ. Code § 1710(2))

(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity as a manufacturer of Minecraft, and DOES 1-50)

391. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

392. At all relevant times, each Defendant was engaged in the business of designing, developing, managing, operating, testing, producing, manufacturing, labeling, marketing, advertising, promoting, controlling, supplying, leasing, selling, and/or otherwise distributing their respective video game Products used by Thomas K. Litton, each of which are defective and unreasonably dangerous.

393. As detailed herein, Defendants knew about the defective conditions of their respective Products and that the Products posed serious health risks to users, particularly minors.

394. Each Defendant designed their respective product with addictive psychological features to keep users playing more often and for longer periods of time, while knowing that abuse and compulsive use by youth can lead to injury, but concealed this information from the public and Product users, including Plaintiff Thomas K. Litton.

395. Each Defendant knew of the risks associated with the use of their respective Products based on internal research and external studies known within the industry.

396. Each Defendant could have disclosed the defective condition of their respective Products to the public and could have advised that the Products posed serious health risks to users, particularly youth. No Defendant took such action; instead, each Defendant opted to omit the safety risks from any disclosures of marketing practices.

397. Each Defendant knowingly and intentionally misrepresented that their respective Products were safe for use, and safe as an educational tool, to further entice users to continue engaging with their Products, including Plaintiff Thomas K. Litton, while simultaneously knowing that their respective Products each caused addiction and compulsive use.

1 398. Defendant Roblox Corp. stated that it has “built a platform with safety at the
2 foundation,” that it has a “commitment to safety and civility,” and that it consulted “child
3 development experts” and “examined global industry standards” when creating recommendations
4 for its Product. Further, Roblox Corp. stated that “safety is and always has been foundational to
5 everything [it does] at Roblox,” that “[s]afety underpins everything [it does] at Roblox, particularly
6 the safety of [its] youngest users,” and finally that it “spend[s] hundreds of millions of dollars each
7 year to meet [its] safety mission.”

8 399. Defendant Epic Games stated that it wants its Product to be a “safe place for [users]”
9 and that its Product is educational and safe for use in classrooms. Defendant Epic Games also states
10 that it wants to “be on the forefront of creating fun and safe games and experiences for people of
11 all ages.”

12 400. Defendants Microsoft and Mojang stated that they will “hold [them]selves
13 accountable for making Minecraft as safe as possible for everyone.” Defendants Microsoft and
14 Mojang further state that it is “so important that [their] games are a safe and welcoming place for
15 all players,” that “player safety is a priority for Mojang to ensure everyone feels safe,” and that their
16 “community standards help [them] build a community that is open and safe for everyone.”

17 401. Each Defendant’s statements about the safety of their respective Products are false and
18 misleading, and each Defendant’s omission of the potential harm caused by Defendants’ respective
19 Products is misleading and deceitful.

20 402. Each Defendant intended for users, including Plaintiff Thomas K. Litton, to rely on
21 their representations that their respective Products were safe for use to keep users engaging with
22 their Products and increase their profits, and purposefully marketed their Products to minors for
23 that reason.

24 403. However, each Defendant had no reasonable grounds to believe that their respective
25 Products were safe given the internal and external research on addiction and given the global
26 recognition of video game addiction. Each Defendant made false statements about the safety of
27 their respective Products.
28

1 404. Each Defendant failed to disclose to users, including Plaintiff Thomas K. Litton, that
2 their respective Products are designed to create and sustain addiction.

3 405. Each Defendant failed to disclose to users the strategies and features designed and
4 employed in their respective Products to create and sustain addiction.

5 406. Each Defendant failed to disclose their addictive strategies and features to entice users
6 to continue gameplay and increase profits.

7 407. If each Defendant had not concealed, omitted, and misrepresented facts regarding the
8 safety of their Products, and had Plaintiff Thomas K. Litton been aware that the Products could
9 cause significant harm such as impacts on brain function, psychological injury, aggressive behavior,
10 verbal memory deficiency, depression, lowered cognitive abilities, sleeping disorders, anxiety, and
11 behavioral addiction disorders, Thomas K. Litton would not have used or continued to use
12 Defendants' respective Products. Alternatively, if Defendants had adequately warned or instructed
13 Thomas K. Litton, he would have taken precautions when using each Defendant's respective
14 Product in order to eliminate or mitigate the risk of harm.

15 408. Plaintiff Thomas K. Litton was unaware of the dangerous and addictive nature of each
16 Defendant's Products. Plaintiff reasonably relied on each Defendant's representations that its
17 Products were safe for use, particularly for minors.

18 409. Plaintiff Thomas K. Litton reasonably relied on each Defendant's representations and
19 did not know, nor had any way of knowing, about the misrepresentations about Defendants'
20 respective Products.

21 410. A reasonable person, including Plaintiff Thomas K. Litton, would find information
22 that impacted the users' health, safety, and well-being – such as the serious adverse health risks
23 associated with the use of Defendants' Products – to be important when deciding whether to
24 purchase, download, use, or to continue to use, those Products. Thus, Plaintiff Thomas K. Litton
25 justifiably relied on each Defendant's misrepresentations that the Products were safe when
26 purchasing, downloading, playing, continuing to use, and/or purchasing downloadable game
27 content.
28

1 411. Because of Plaintiff Thomas K. Litton's reasonable reliance on each Defendant's
2 representations, Plaintiff sustained physical and psychological harm, as well as damages.

3 412. Each Defendant's misrepresentations were a substantial factor in causing harm to
4 Plaintiff Thomas K. Litton, who suffered significant injury, harm, damages, and economic loss, and
5 will continue to suffer such harm, damages, and economic loss in the future. Thus, Plaintiff seeks
6 actual damages according to proof.

7 **COUNT IX – FRAUD**

8 **(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity**
9 **as a manufacturer of Minecraft, and DOES 1-50)**

10 413. Plaintiff Thomas K. Litton realleges and incorporates by reference all of the foregoing
11 allegations as if repeated in full here.

12 414. At all relevant times, each Defendant was engaged in the business of designing,
13 developing, managing, operating, testing, producing, manufacturing, labeling, marketing,
14 advertising, promoting, controlling, supplying, leasing, selling, and/or otherwise distributing their
15 respective video game Products used by Thomas K. Litton, each of which are defective and
16 unreasonably dangerous.

17 415. As detailed herein, each Defendant knew about the defective conditions of its Products
18 and that the Products posed serious health risks to users, particularly minors, young adults, and
19 neurodivergent individuals.

20 416. Each Defendant knew their Products posed risks to minors, like Thomas K. Litton,
21 based on internal research and external studies known in the industry and to each Defendant; yet
22 each Defendant misrepresented the safety and value of their games for the purpose of inducing
23 users, like Thomas K. Litton, to purchase/download the game and to continue using Defendants'
24 Products and encourage the addiction knowingly caused by Defendants' respective Products.

25 417. Defendant Roblox Corp. stated that it has "built a platform with safety at the
26 foundation," that it has a "commitment to safety and civility," and that it consulted "child
27 development experts" and "examined global industry standards" when creating recommendations
28 for its Product. Further, Roblox Corp. stated that "safety is and always has been foundational to

1 everything [it does] at Roblox,” that “[s]afety underpins everything [it does] at Roblox, particularly
2 the safety of [its] youngest users,” and finally that it “spend[s] hundreds of millions of dollars each
3 year to meet [its] safety mission.”

4 418. Defendant Epic Games stated that it wants its Product to be a “safe place for [users]”
5 and that its Product is educational and safe for use in classrooms. Defendant Epic Games also states
6 that it wants to “be on the forefront of creating fun and safe games and experiences for people of
7 all ages.”

8 419. Defendants Microsoft and Mojang stated that they will “hold [them]selves
9 accountable for making Minecraft as safe as possible for everyone.” Defendants Microsoft and
10 Mojang further state that it is “so important that [their] games are a safe and welcoming place for
11 all players,” that “player safety is a priority for Mojang to ensure everyone feels safe,” and that their
12 “community standards help [them] build a community that is open and safe for everyone.”

13 420. Each Defendant’s statements about the safety of their respective Products are false and
14 misleading, and each Defendant’s omission of the potential harm caused by Defendants’ respective
15 Products is misleading and deceitful.

16 421. Each Defendant could have disclosed the defective condition of their Products to the
17 public and could have advised that the Products posed serious health risks to users, particularly
18 youth. No Defendant took such action; instead, each Defendant opted to omit the safety risks from
19 any disclosures or marketing practices.

20 422. Each Defendant knowingly and intentionally misrepresented that their respective
21 Products were safe for use to further entice users to continue engaging with their Products, including
22 Plaintiff Thomas K. Litton

23 423. Each Defendant intended for users, including Plaintiff Thomas K. Litton, to rely on
24 their representations that their respective Products were safe for use to keep users engaging with
25 their Products and increase their profits, and purposefully marketed their Products to minors for
26 that reason.

27 424. If each Defendant had not concealed, omitted, and misrepresented facts regarding the
28 safety of their Products, and had Plaintiff been aware that the Products could cause significant harm

1 such as impacts on brain function, psychological injury, aggressive behavior, verbal memory
2 deficiency, depression, lowered cognitive abilities, sleeping disorders, anxiety, and behavioral
3 addiction disorders, Thomas K. Litton would not have used or continued to use Defendants'
4 respective Products. Alternatively, if Defendants had adequately warned or instructed Thomas K.
5 Litton, he would have taken precautions when using each Defendant's respective Product in order
6 to eliminate or mitigate the risk of harm.

7 425. However, each Defendant had no reasonable grounds to believe that their respective
8 Products were safe given the internal and external research on addiction and given the global
9 recognition of video game addiction. Each Defendant knowingly made false statements about the
10 safety of their respective Products.

11 426. As a direct and proximate result of each Defendant's material omissions, Plaintiff
12 Thomas K. Litton had no reason to believe that each of Defendant's Products were unsafe for
13 children to use.

14 427. Plaintiff Thomas K. Litton reasonably relied on each Defendant's misrepresentations
15 that each of their Products was safe for use.

16 428. A reasonable person, including Plaintiff Thomas K. Litton, would find information
17 that impacted the users' health, safety, and well-being – such as the serious adverse health risks
18 associated with the use of Defendants' respective Products – to be important when deciding whether
19 to purchase, download, use, or to continue to use, those Products. Thus, Plaintiff Thomas K. Litton
20 justifiably relied on each Defendant's misrepresentations that the Products were safe when
21 purchasing, downloading, playing, continuing to use, and/or purchasing downloadable game
22 content.

23 429. As a direct and proximate result of each Defendant's material misrepresentations and
24 false statements, Plaintiff Thomas K. Litton suffered significant injury, harm, damages, and
25 economic loss, and will continue to suffer such harm, damages, and economic loss in the future.
26 Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the
27 future.
28

430. Each Defendant's actions and omissions as alleged in this Complaint were intentional, oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT X – VIOLATION OF CALIFORNIA'S UNFAIR COMPETITION LAW

(Cal. Bus. & Prof. Code §§ 17200 *et seq.*)

(Against Defendants Roblox Corporation, Epic Games, Mojang AB, Microsoft in its capacity as a manufacturer of Minecraft, and DOES 1-50)

431. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

432. Defendants are corporations, and thus each of them is a "person," as defined by California Business & Professions Code § 17201.

433. California's Unfair Competition Law ("UCL"), Business and Professions Code § 17200, *et seq.*, prohibits any "unlawful, unfair or fraudulent business act or practice" and any "unfair, deceptive, untrue or misleading advertising."

434. By the conduct described in detail above and incorporated herein, each Defendant engaged in unfair and deceptive acts in violation of California's Unfair Competition Law.

435. Each Defendant knowingly engaged in the production, design, distribution, and sale of the Products to users, including Thomas K. Litton, which were unsafe and addictive, particularly for minors.

436. Each Defendant promoted their Products to users, especially minor users, while concealing harmful information about the addictive and unsafe nature of said Products.

437. These business practices that Defendants have engaged in are fraudulent and deceptive practices in violation of the UCL.

438. Each Defendant's business practices are also unfair in violation of the UCL. Each Defendant's actions are unethical at minimum, and the benefit of employing their deceptive and addictive features does not, in any circumstance, outweigh the harm that Plaintiff Thomas K. Litton suffered.

439. As a direct and proximate result of the foregoing acts and practices, each Defendant has received, or will receive, income, profits, and other benefits, which they would not have received if they had not engaged in the violations of the UCL described herein.

440. As a direct and proximate result of each Defendant's conduct, Plaintiff Thomas K. Litton sustained economic losses, including hundreds of dollars per year in video game related spending. Had each Defendant not engaged in these fraudulent and deceptive practices, Plaintiff would not have sustained the aforementioned economic injuries.

441. As a result of each Defendant's conduct, Plaintiff Thomas K. Litton sustained significant injuries.

442. As such, in accordance with the provisions of the California Business and Professions Code §§ 17200 and 17203, Plaintiff requests that this Court enjoin each Defendant from continuing to violate the UCL or violating it in the same fashion in the future, and from continuing to conduct business via the unfair and fraudulent business acts as set forth in this Complaint.

COUNT XI – STRICT PRODUCT LIABILITY – DESIGN DEFECT

(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)

443. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

444. At all relevant times, Defendant was engaged in the business of designing, developing, managing, operating, testing, producing, manufacturing, labeling, marketing, advertising, promoting, controlling, supplying, leasing, selling, and/or otherwise distributing the Xbox Product⁸⁰ used by Thomas K. Litton, which is defective and unreasonably dangerous.

445. The Product Defendant placed into the stream of commerce was defectively designed. The Product was designed to cause addictive and compulsive use, including by minors. The Product is not reasonably fit, suitable, or safe for its intended purpose.

⁸⁰ Defendant Microsoft's Xbox platform may be referred to as "the Product" in Counts XI – XX.

1 446. The defective condition of the Xbox Product rendered it unreasonably dangerous
2 and/or not reasonably safe. The foreseeable risks outweigh the benefits associated with the
3 Product's design.

4 447. The defects in the Product were present in the Product when it left the hands of
5 Defendant and when it was released to the general public to be used in an intended and foreseeable
6 manner.

7 448. Defendant's Product, as designed, was unreasonably dangerous, posed a substantial
8 likelihood of harm, and was therefore defective because of the reasons enumerated in this
9 Complaint, including, but not limited to, the Product's design including addictive operant
10 conditioning, the Product's design lacking warnings about the risk of addiction, the Product's
11 design lacking safeguards such as easily available user-imposed time restrictions on gameplay, the
12 Product's design lacking proper minor age verification, and the Product failing to operate as a
13 reasonable user would expect.

14 449. Defendant designed its Product to be addictive and take advantage of the chemical
15 reward system of users' brains to establish compulsive use and addiction.

16 450. Defendant's Product was expected to and did reach Plaintiff without substantial
17 change in the condition in which it was designed, manufactured, labeled, marketed, promoted,
18 supplied, and otherwise released into the stream of commerce.

19 451. Thomas K. Litton used Defendant's Product in an intended and reasonably foreseeable
20 manner, and the Product was not materially altered prior to its use.

21 452. Defendant knew or, by the exercise of reasonable care, should have known that
22 minors, including Thomas K. Litton, would use its Product without anyone inspecting the Product
23 for addictive or other dangerous features.

24 453. Reasonable users of Defendant's Product would not expect, and Plaintiff herein did
25 not expect, that said Product would pose risks of severe physical and mental harm.

26 454. Reasonable users of Defendant's Product would not expect that Defendant knew about
27 risks of severe physical and mental harm and nevertheless chose to place its Product into the stream
28 of commerce.

1 455. Defendant could have utilized cost effective, reasonably feasible alternative designs
2 to minimize these harms, such as by designing its Product without the harm causing features listed
3 above while still providing an optimal gaming experience.

4 456. At the time Defendant's Product was designed, developed, distributed to Thomas K.
5 Litton, and played, safer alternative designs existed that were entirely feasible.

6 457. Defendant could have utilized cost effective, reasonably feasible alternative designs
7 to minimize harm caused by its Product by implementing elements that include, but are not limited
8 to:

- 9 a. Robust age verification;
10 b. Effective parental controls;
11 c. The removal of barriers to the enactment of parental controls;
12 d. Warnings of health effects of use and extended use;
13 e. Opt-in restrictions to the length and frequency of sessions;
14 f. Self-limiting tools, including but not limited to session time notifications,
15 warnings, or reports.
16 g. Self-imposed limits for microtransactions; and
17 h. Others as set forth herein.

18 458. Instead, Defendant designed its Product to aggressively addict users with features that
19 increase use time, frequency of use, and profit to Defendant, all to the detriment of users' wellbeing.

20 459. Defendant's defective Product, and Thomas K. Litton's use of Defendant's Product,
21 were the direct and proximate cause of Thomas K. Litton's injuries and harm that include, but are
22 not limited to, emotional distress, diminished social interactions, lack of interest in other hobbies,
23 withdrawal symptoms such as rage, anger, and physical outbursts.

24 460. Plaintiff Thomas K. Litton's injuries—physical, emotional, and economic—were
25 reasonably foreseeable to Defendant at the time of the Product's design, marketing, and operation.

26 461. As a direct and proximate result of Defendant's defective Product, Plaintiff Thomas
27 K. Litton suffered significant injury, harm, damages, and economic loss, and will continue to suffer
28

1 such harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent
2 and will require more medical care and treatment in the future.

3 462. Defendant's actions and omissions as alleged in this Complaint were intentional,
4 oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without
5 regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of
6 punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

7 **COUNT XII – STRICT PRODUCT LIABILITY – FAILURE TO WARN**

8 **(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)**

9 463. Plaintiff realleges and incorporates by reference all of the foregoing allegations of
10 every paragraph of this Complaint as if repeated in full here.

11 464. At all relevant times, Defendant was engaged in the business of designing, developing,
12 managing, operating, testing, producing, manufacturing, labeling, marketing, advertising,
13 promoting, controlling, supplying, leasing, selling, and/or otherwise distributing the Xbox Product
14 used by Thomas K. Litton, which is defective and unreasonably dangerous.

15 465. Defendant knew that its Product was and is harmful, capable of causing and in fact
16 was designed to cause compulsive, addictive use, particularly in minors, and that such use could
17 result in severe physical, mental, and emotional injuries.

18 466. Defendant knew, or should have known, that ordinary consumers such as Plaintiff
19 would not have realized the potential risks of the Product.

20 467. Defendant knew, or should have known, that the use of its Product was dangerous,
21 harmful, and injurious when used by Plaintiff in a reasonably foreseeable manner.

22 468. Defendant owed a duty to warn consumers of the foreseeable risks and dangers of the
23 Product that the Defendant knew were present but not obvious or known to users, especially
24 underage users, or their caregivers, or any average member of the consuming public.

25 469. At the time Defendant's Product left Defendant's control, it did not include – nor has
26 it ever included – a warning that the Product poses an unreasonable risk of harm to users,
27 particularly minors.
28

1 470. Defendant failed to provide timely and adequate warnings, instructions, and
2 information by, including but not limited to:

- 3 a. failing to ensure the Product included warnings regarding its addictive
4 design that were accurate, conspicuous, and adequate, despite having
5 extensive knowledge of the risks associated with its use;
- 6 b. failing to conduct adequate pre-and-post-market safety testing such that an
7 adequate warning could have been issued to users;
- 8 c. failing to include adequate and conspicuous warnings that would alert users
9 to the dangerous risks of the Product, including but not limited to the risks
10 of causing severe and life-altering physical, mental, and emotional disorders
11 and behaviors in minors, especially those with neurodivergent qualities;
- 12 d. failing to issue warnings to consumers regarding the dangerous risks of the
13 Product even after its purchase; and
- 14 e. representing that the Product was and is safe for use, when in fact, Defendant
15 knew or should have known that its Product was designed to cause minors
16 to engage in excessive use until they developed an addiction or disordered
17 compulsion to use the Product.

18 471. Moreover, Defendant breached its duty of care owed to Plaintiff through its non-
19 feasance, failure to act, and omissions in the development, setup, management, maintenance,
20 operation, marketing, advertising, promotion, supervision, and control of its Product. Those
21 breaches include but are not limited to:

- 22 a. designing the Product to be more addictive and to target specific individuals based
23 on information obtained and retained by Defendant and/or third-parties;
- 24 b. failing to implement effective parental controls;
- 25 c. failing to implement reasonably available means for users or their parents to
26 monitor for and limit or deter their own excessive frequency or duration of use of
27 the Product, including patterns, frequency, or duration of use that are indicative of
28 addiction, compulsive use, or overuse; and

d. failing to implement reasonably available means to set an overall spending limit for minors on downloadable content on the Xbox Product.

472. Defendant's failure to adequately warn about its defective Product created a danger of injuries described herein that were reasonably foreseeable at the time of the design, development, and dissemination of the Product.

473. A reasonable company under the same or similar circumstances would have warned and instructed Plaintiff of these dangers of its Product.

474. Had Plaintiff Thomas K. Litton been aware that the Product could cause significant harm such as impacts on brain function, psychological injury, aggressive behavior, verbal memory deficiency, depression, lowered cognitive abilities, sleeping disorders, anxiety, and behavioral addiction disorders, Thomas K. Litton would not have used or continued to use Defendant's Product. Alternatively, if Defendant had adequately warned or instructed Thomas K. Litton, he would have taken precautions when using Defendant's Product in order to eliminate or mitigate the risk of harm.

475. The addictive nature of Defendant's defective Product and failure to warn about said Product was a substantial factor in Plaintiff Thomas K. Litton's significant injury, harm, damages, and economic loss. Plaintiff Thomas K. Litton will continue to suffer such harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the future.

476. Defendant's actions and omissions as alleged in this Complaint were intentional, oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT XIII – NEGLIGENCE – DESIGN

(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)

477. Plaintiff Thomas K. Litton realleges and incorporates by reference all of the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

1 478. At all relevant times, Defendant was engaged in the business of designing, developing,
2 managing, operating, testing, producing, manufacturing, labeling, marketing, advertising,
3 promoting, controlling, supplying, leasing, selling, and/or otherwise distributing its Product used
4 by Thomas K. Litton, which are defective and unreasonably dangerous.

5 479. Defendant knew, or should have known, that the use of its Product was dangerous,
6 harmful, and injurious when used by Plaintiff in a reasonably foreseeable manner.

7 480. Defendant knew, or should have known, that ordinary consumers such as Plaintiff
8 Thomas K. Litton would not have realized the potential risks and dangers of its Product.

9 481. Defendant owed a duty to all reasonably foreseeable users to design a safe product.

10 482. Defendant's Product as designed was unreasonably dangerous, posed a substantial
11 likelihood of harm, and was therefore defective because of the reasons enumerated in this
12 Complaint, including, but not limited to the creation of a Product that does not contain warnings
13 about the potential harm of use, the creation of a Product without proper minor age verification,
14 and because the Product created failed to operate as a reasonable user would expect.

15 483. Defendant breached its duty by failing to use reasonable care in the design of its
16 Product by negligently designing its Product to specifically appeal to minors, who were particularly
17 unable to appreciate the risks of the Product.

18 484. Defendant breached its duty by failing to use cost effective, reasonably feasible
19 alternative designs that would make the product less harmful to minors, including but not limited
20 to:

- 21 a. Robust age verification;
- 22 b. Effective parental controls;
- 23 c. The removal of barriers to the enactment of parental controls;
- 24 d. Warnings of health effects of use and extended use upon sign-up;
- 25 e. Opt-in restrictions to the length and frequency of sessions;
- 26 f. Self-limiting tools, including but not limited to session time notifications,
27 warnings, or reports.
- 28 g. Self-imposed limits for microtransactions; and

1 h. Others as set forth herein.

2 485. Defendant breached its duty by failing to use cost effective, reasonably feasible
3 alternative designs that could have reduced mental and physical harm to users, especially youth.
4 Instead, Defendant designed a Product that increased addictiveness, use time, frequency of use, and
5 engagement with the Product.

6 486. A reasonable company under the same or similar circumstances would have designed
7 a safer product.

8 487. Plaintiff was harmed directly and proximately by the Defendant's failure to use
9 reasonable care in the design of its Product.

10 488. As a direct and proximate result of Defendant's negligence, Plaintiff Thomas K. Litton
11 suffered significant injury, harm, damages, and economic loss, and will continue to suffer such
12 harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and
13 will require more medical care and treatment in the future.

14 489. Defendant's actions and omissions as alleged in this Complaint were intentional,
15 oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without
16 regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of
17 punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

18 **COUNT XIV – NEGLIGENCE – FAILURE TO WARN**

19 **(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)**

20 490. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing
21 allegations of every paragraph of this Complaint as if repeated in full here.

22 491. At all relevant times, Defendant was engaged in the business of designing, developing,
23 managing, operating, testing, producing, manufacturing, labeling, marketing, advertising,
24 promoting, controlling, supplying, leasing, selling, and/or otherwise distributing its Product used
25 by Thomas K. Litton, which is defective and unreasonably dangerous.

26 492. Defendant knew, or should have known, that the use of Defendant's Product was
27 dangerous, harmful, and injurious when used by Plaintiff in a reasonably foreseeable manner.
28

1 493. Defendant knew or, by the exercise of reasonable care should have known, that its
2 Product posed risks of harm to youth. These risks were known and knowable considering
3 Defendant's own internal information and knowledge regarding its Product at the time of the
4 Product's development, design, marketing, promotion, advertising, and distribution to Thomas K.
5 Litton

6 494. Defendant knew, or should have known, that ordinary consumers such as Plaintiff
7 would not have realized the potential risks and dangers of Defendant's Product.

8 495. Defendant's Product, as identified herein, does not contain a warning, nor has it ever
9 contained a warning that its Product poses an unreasonable risk of harm to users, particularly
10 minors. Defendant's Product did not contain a warning of these risks when the Product left its
11 possession.

12 496. Had Plaintiff Thomas K. Litton been aware that the Product could cause significant
13 harm such as impacts on brain function, psychological injury, aggressive behavior, verbal memory
14 deficiency, depression, lowered cognitive abilities, sleeping disorders, anxiety, and behavioral
15 addiction disorders, Thomas K. Litton would not have used or continued to use Defendant's
16 Product. Alternatively, if Defendant had adequately warned or instructed Thomas K. Litton, he
17 would have taken precautions when using Defendant's Product in order to eliminate or mitigate the
18 risk of harm.

19 497. Defendant had a duty to give reasonable and adequate warnings of dangers inherent
20 or reasonably foreseeable in the use of its Product in a manner which the manufacturer should
21 reasonably foresee.

22 498. Defendant breached its duty owed to foreseeable users. That breach includes a failure
23 to warn users that Defendant's Product causes compulsive use and/or other physical and mental
24 injuries.

25 499. A reasonable company under the same or similar circumstances would have used
26 reasonable care to provide adequate warnings to consumers, and parents of minor consumers.

27 500. As a direct and proximate result of Defendant's breach of duty to provide adequate
28 warnings, Plaintiff Thomas K. Litton was harmed and sustained the injuries set forth herein.

1 501. As a direct and proximate result of Defendant's negligence, Plaintiff Thomas K. Litton
 2 suffered significant injury, harm, damages, and economic loss, and will continue to suffer such
 3 harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and
 4 will require more medical care and treatment in the future.

5 502. Defendant's actions and omissions as alleged in this Complaint were intentional,
 6 oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without
 7 regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of
 8 punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

9 **COUNT XV – NEGLIGENCE - ORDINARY**

10 **(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)**

11 503. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing
 12 allegations of every paragraph of this Complaint as if repeated in full here.

13 504. Defendant, in its role as a product designer, developer, manufacturer, marketer, and
 14 seller, and otherwise engaging in activity culminating in placing its Product into the stream of
 15 commerce, owed a duty to exercise ordinary care in designing and placing the Product into the
 16 stream of commerce.

17 505. Defendant also owed a duty to warn users of the hazards of using its Product, which
 18 Defendant knew were present in its Product, though such hazards were not obvious to users and
 19 particularly not so to minor users.

20 506. Defendant's duties also include a duty to exercise ordinary care and act as a reasonably
 21 careful company would under the circumstances.

22 507. Defendant created a harmful and addictive Product and failed to engage in the
 23 development of a safer alternative design.

24 508. For its own profit, Defendant chose not to engage in the development of a safer
 25 alternative design.

26 509. Defendant was negligent, reckless, and/or careless in failing to exercise ordinary care.

27 510. Defendant's failure to act in developing a safer alternative design constitutes a breach
 28 of its duty of reasonable care.

1 511. Defendant knew, or should have known, that its Product is harmful, capable of causing
2 extensive physical, mental, emotional, and financial or economic harm and damage, and that minor
3 users are developing disordered and addicted use.

4 512. Defendant was and is negligent in failing to provide adequate warnings about the
5 dangers associated with using its Product and in failing to warn users, and the parents of users who
6 are minors, including Thomas K. Litton, about how and when, if ever, to safely use its Product.

7 513. Defendant was and is negligent in failing to adequately provide users, and their
8 caregivers in the case of minor users, including Thomas K. Litton, with the tools to ensure that its
9 Product is used in a limited and safe manner.

10 514. As a result of Defendant's breach of the herein identified duties and resulting
11 negligence, Plaintiff suffered severe physical and mental harm, as well as economic damages, from
12 Plaintiff's use of Defendant's Product.

13 515. Defendant's breach of duty of care to Plaintiff Thomas K. Litton was a substantial
14 factor in causing harm to Plaintiff and is the actual and proximate cause of said harm.

15 516. As a direct and proximate result of Defendant's negligence, Plaintiff Thomas K. Litton
16 suffered significant injury, harm, damages, and economic loss, and will continue to suffer such
17 harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and
18 will require more medical care and treatment in the future.

19 517. Defendant's actions and omissions as alleged in this Complaint were intentional,
20 oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without
21 regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of
22 punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

23 **COUNT XVI – STATUTORY NEGLIGENCE**

24 **(Cal. Civ. Code § 1714)**

25 **(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)**

26 518. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing
27 allegations of every paragraph of this Complaint as if repeated in full here.
28

1 519. Defendant had a duty to exercise ordinary care and caution for the safety of individuals
2 using its Product, including Thomas K. Litton.

3 520. Defendant, in its role as product designer, developer, manufacturer, marketer, and
4 seller, and otherwise engaged in activity culminating in placing its Product into the stream of
5 commerce, owed a duty to exercise ordinary care and act as a reasonably careful company would
6 under the circumstances.

7 521. Defendant had a duty to avoid engaging in conduct it knew, or reasonably should have
8 known, would cause injury to its users, including Plaintiff Thomas K. Litton

9 522. Defendant breached these duties.

10 523. Defendant negligently, recklessly, and/or carelessly created harmful and addictive
11 Product and failed to engage in the development of safer alternative platforms.

12 524. Defendant knew, or should have known, that its Product is harmful, capable of causing
13 extensive physical, mental, emotional, and financial or economic harm and damage, and that minor
14 users are developing disordered and addicted use.

15 525. Defendant was and is negligent in failing to provide adequate warnings about the
16 dangers associated with using its Product and in failing to warn users, and the parents of users who
17 are minors, including Thomas K. Litton, about how and when, if ever, to safely use their Product.

18 526. Defendant was and is negligent in failing to provide users, and their caregivers in the
19 case of users who are minors, including Thomas K. Litton, the tools to ensure that its Product is
20 used in a limited and safe manner.

21 527. As a result of Defendant's negligence, Plaintiff Thomas K. Litton suffered severe
22 physical and mental harm, as well as economic damages, from Plaintiff's use of Defendant's
23 Product.

24 528. Defendant's breach of duty of care to Plaintiff Thomas K. Litton was a substantial
25 factor in causing harm to Plaintiff and is the actual and proximate cause of said harm.

26 529. As a direct and proximate result of Defendant's negligence, Plaintiff Thomas K. Litton
27 suffered significant injury, harm, damages, and economic loss, and will continue to suffer such
28

1 harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and
2 will require more medical care and treatment in the future.

3 530. Defendant's actions and omissions as alleged in this Complaint were intentional,
4 oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without
5 regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of
6 punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

7 **XVII – INTENTIONAL MISREPRESENTATION**

8 **(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)**

9 531. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing
10 allegations of every paragraph of this Complaint as if repeated in full here.

11 532. At all relevant times, Defendant was engaged in the business of designing, developing,
12 managing, operating, testing, producing, manufacturing, labeling, marketing, advertising,
13 promoting, controlling, supplying, leasing, selling, and/or otherwise distributing its Product used
14 by Thomas K. Litton, which was defective and unreasonably dangerous.

15 533. As detailed herein, Defendant knew about the defective conditions of its Product and
16 that the Product posed serious health risks to users, particularly minors.

17 534. Defendant designed its Product with addictive psychological features to keep users
18 playing more often and for longer periods of time, while knowing that abuse and compulsive use
19 by youth can lead to injury, but concealed this information from the public and Product users,
20 including Plaintiff Thomas K. Litton and Plaintiff's guardian.

21 535. Defendant knew of the risks associated with the use of its Product based on internal
22 research and external studies known within the industry.

23 536. Defendant could have disclosed the defective condition of its Product to the public
24 and could have advised that the Product posed serious health risks to users, particularly youth.
25 Defendant took no such action; instead, Defendant opted to omit the safety risks from any
26 disclosures.

27 537. Defendant knowingly and intentionally misrepresented that its Product was safe for
28 use to further entice users to purchase and continue engaging with its Product, including Plaintiff

1 Thomas K. Litton, while simultaneously knowing that its Product caused addiction and compulsive
2 use.

3 538. Defendant stated that “Xbox strives to create a safer gaming experience for you and
4 your family,” and that its Xbox Store is “safer for the whole family” to use. Defendant also stated
5 that it “hold[s] [itself] accountable for making [its] platforms as safe as possible for all players” and
6 it “will promote the availability of our safety tools through our platforms, support channels,
7 services, on our websites and in retail stores to reach more players and parents.”

8 539. Defendant’s statements about the safety of its Product are false and misleading, and
9 Defendant’s omission of the potential harm caused by its Product is misleading and deceitful.

10 540. Defendant intended for users, including Plaintiff Thomas K. Litton, to rely on its
11 representations that its Product was safe for use to keep users engaging with its Product and increase
12 its profits, and purposefully marketed its Product to minors for that reason.

13 541. However, Defendant had no reasonable grounds to believe that its Product was safe
14 given the internal and external research on addiction associated with video game use and given the
15 global recognition of video game addiction. Defendant knowingly made false statements about the
16 safety of its Product.

17 542. Defendant failed to disclose to users, including Plaintiff Thomas K. Litton and
18 Plaintiff’s guardian, that its Product is designed to create and sustain addiction.

19 543. Defendant intentionally failed to disclose to users the strategies and features designed
20 and employed in its Product to create and sustain addiction.

21 544. Defendant intentionally failed to disclose its addictive strategies and features to entice
22 users to continue gameplay and increase profits.

23 545. If Defendant had not concealed, omitted, and misrepresented facts regarding the safety
24 of its Product, and had Plaintiff been aware that the Product could cause significant harm such as
25 impact on brain function, psychological injury, aggressive behavior, verbal memory deficiency,
26 depression, lowered cognitive abilities, sleeping disorders, anxiety, and behavioral addiction
27 disorders, Thomas K. Litton would not have used or continued to use Defendant’s Product.
28

1 Alternatively, if Defendant had adequately warned or instructed Thomas K. Litton, he would have
2 taken precautions when using Defendant's Product in order to eliminate or mitigate the risk of harm.

3 546. Plaintiff Thomas K. Litton was unaware of the dangerous and addictive nature of
4 Defendant's Product. Plaintiff reasonably relied on Defendant's representations that its Product was
5 safe for use, particularly for minors.

6 547. Plaintiff Thomas K. Litton reasonably relied on Defendant's representations and did
7 not know, nor had any way of knowing, about the misrepresentations about Defendant's Product.

8 548. A reasonable person, including Plaintiff Thomas K. Litton, would find information
9 that impacted the users' health, safety, and well-being – such as the serious adverse health risks
10 associated with the use of Defendant's Product – to be important when deciding whether to
11 purchase, download, use, or to continue to use, that Product. Thus, Plaintiff Thomas K. Litton
12 justifiably relied on Defendant's misrepresentations that the Product was safe when purchasing,
13 using, and/or continuing to use Defendant's Product.

14 549. Because of Plaintiff Thomas K. Litton's reasonable reliance on Defendant's
15 representations, Plaintiff sustained physical and psychological harm, as well as economic damages.

16 550. As a direct and proximate result of Defendant's material misrepresentations and false
17 statements, Plaintiff Thomas K. Litton suffered significant injury, harm, damages, and economic
18 loss, and will continue to suffer such harm, damages, and economic loss in the future. Thomas K.
19 Litton's injuries are permanent and will require more medical care and treatment in the future.

20 551. Defendant's actions and omissions as alleged in this Complaint were intentional,
21 oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without
22 regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of
23 punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

24 **COUNT XVIII– NEGLIGENT MISREPRESENTATION**

25 **(Cal. Civ. Code § 1710(2))**

26 **(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)**

27 552. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing
28 allegations of every paragraph of this Complaint as if repeated in full here.

1 553. At all relevant times, Defendant was engaged in the business of designing, developing,
2 managing, operating, testing, producing, manufacturing, labeling, marketing, advertising,
3 promoting, controlling, supplying, leasing, selling, and/or otherwise distributing its Product used
4 by Thomas K. Litton, which are defective and unreasonably dangerous.

5 554. As detailed herein, Defendant knew about the defective conditions of its Product and
6 that the Product posed serious health risks to users, particularly minors.

7 555. Defendant designed the Xbox Product with addictive psychological features to keep
8 users playing more often and for longer periods of time, while knowing that abuse and compulsive
9 use by youth can lead to injury, but concealed this information from the public and Product users,
10 including Plaintiff Thomas K. Litton and Plaintiff's guardian.

11 556. Defendant knew of the risks associated with the use of its Product based on internal
12 research and external studies known within the industry.

13 557. Defendant could have disclosed the defective condition of its Product to the public
14 and could have advised that the Product posed serious health risks to users, particularly youth.
15 Defendant took no such action; instead, Defendant opted to omit the safety risks from any
16 disclosures.

17 558. Defendant knowingly and intentionally misrepresented that its Product was safe for
18 use, and safe as an educational tool, to further entice users to continue engaging with its Product,
19 including Plaintiff Thomas K. Litton and Plaintiff's guardian, while simultaneously knowing that
20 its Product caused addiction and compulsive use.

21 559. Defendant stated that "Xbox strives to create a safer gaming experience for you and
22 your family," and that its Xbox Store is "safer for the whole family" to use. Defendant also stated
23 that it "hold[s] [itself] accountable for making [its] platforms as safe as possible for all players" and
24 it "will promote the availability of our safety tools through our platforms, support channels,
25 services, on our websites and in retail stores to reach more players and parents."

26 560. Defendant intended for users, including Plaintiff Thomas K. Litton, to rely on its
27 representations that its Product was safe for use to keep users engaging with its Product and increase
28 its profits, and purposefully marketed its Product to minors for that reason.

1 561. However, Defendant had no reasonable grounds to believe that its Product was safe
2 given the internal and external research on addiction associated with video game use and given the
3 global recognition of video game addiction. Defendant made false statements about the safety of its
4 Product.

5 562. Defendant failed to disclose to users, including Plaintiff Thomas K. Litton, that its
6 Product is designed to create and sustain addiction.

7 563. Defendant failed to disclose to users the strategies and features designed and employed
8 in its Product to create and sustain addiction.

9 564. Defendant failed to disclose its addictive strategies and features to entice users to
10 continue gameplay and increase profits.

11 565. If Defendant had not concealed, omitted, and misrepresented facts regarding the safety
12 of its Product, and had Plaintiff been aware that the Product could cause significant harm such as
13 impacts on brain function, psychological injury, aggressive behavior, verbal memory deficiency,
14 depression, lowered cognitive abilities, sleeping disorders, anxiety, and behavioral addiction
15 disorders, Thomas K. Litton would not have used or continued to use Defendant's Product.
16 Alternatively, if Defendant had adequately warned or Thomas K. Litton, he would have taken
17 precautions when using Defendant's Product in order to eliminate or mitigate the risk of harm.

18 566. Plaintiff Thomas K. Litton was unaware of the dangerous and addictive nature of
19 Defendant's Product. Plaintiff reasonably relied on Defendant's representations that its Product was
20 safe for use, particularly for minors.

21 567. Plaintiff Thomas K. Litton reasonably relied on Defendant's representations and did
22 not know, nor had any way of knowing, about the misrepresentations about Defendant's Product.

23 568. A reasonable person, including Plaintiff Thomas K. Litton, would find information
24 that impacted the users' health, safety, and well-being – such as the serious adverse health risks
25 associated with the use of Defendant's Product – to be important when deciding whether to
26 purchase, download, use, or to continue to use, that Product. Thus, Plaintiff Thomas K. Litton
27 justifiably relied on Defendant's misrepresentations that the Product was safe when purchasing,
28 using, and/or continuing to use the Product.

569. Because of Plaintiff Thomas K. Litton's reasonable reliance on Defendant's representations, Plaintiff sustained physical and psychological harm, as well as economic damages.

570. Defendant's misrepresentations were a substantial factor in causing harm to Plaintiff Thomas K. Litton, who suffered significant injury, harm, damages, and economic loss, and will continue to suffer such harm, damages, and economic loss in the future. Thus, Plaintiff seeks actual damages according to proof.

COUNT XIX – FRAUD

(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)

571. Plaintiff Thomas K. Litton realleges and incorporates by reference all of the foregoing allegations as if repeated in full here.

572. At all relevant times, Defendant was engaged in the business of designing, developing, managing, operating, testing, producing, manufacturing, labeling, marketing, advertising, promoting, controlling, supplying, leasing, selling, and/or otherwise distributing its Product used by Thomas K. Litton, which are defective and unreasonably dangerous.

573. As detailed herein, Defendant knew about the defective conditions of its Product and that the Product posed serious health risks to users, particularly minors, young adults, and neurodivergent individuals.

574. Defendant knew its Product posed risks to minors, like Thomas K. Litton, based on internal research and external studies known in the industry and to Defendant; yet Defendant misrepresented the safety and value of its Product for the purpose of inducing users, like Thomas K. Litton, to purchase its Product, to continue using Defendant's Product, and encourage the addiction knowingly caused by Defendant's Product.

575. Defendant stated that “Xbox strives to create a safer gaming experience for you and your family,” and that its Xbox Store is “safer for the whole family” to use. Defendant also stated that it “hold[s] [itself] accountable for making [its] platforms as safe as possible for all players” and it “will promote the availability of our safety tools through our platforms, support channels, services, on our websites and in retail stores to reach more players and parents.”

1 576. Defendant designed the Xbox Product with addictive psychological features to keep
2 users playing more often and for longer periods of time, while knowing that abuse and compulsive
3 use by youth can lead to injury, but concealed this information from the public and Product users,
4 including Plaintiff Thomas K. Litton.

5 577. Defendant could have disclosed the defective condition of its Product to the public
6 and could have advised that the Product posed serious health risks to users, particularly youth.
7 Defendant took no such action; instead, Defendant opted to omit the safety risks from any
8 disclosures or marketing practices.

9 578. Defendant knowingly and intentionally misrepresented that its Product was safe for
10 use to further entice users to continue engaging with its Product, including Plaintiff Thomas K.
11 Litton, while simultaneously knowing that its Product caused addiction and compulsive use.

12 579. Defendant intended for users, including Plaintiff Thomas K. Litton, to rely on its
13 representations that its Product was safe for use to keep users engaging with its Product and increase
14 its profits, and purposefully marketed its Product to minors for that reason.

15 580. If Defendant had not concealed, omitted, and misrepresented facts regarding the safety
16 of its Product, and had Plaintiff been aware that the Product could cause significant harm such as
17 impacts on brain function, psychological injury, aggressive behavior, verbal memory deficiency,
18 depression, lowered cognitive abilities, sleeping disorders, anxiety, and behavioral addiction
19 disorders, Thomas K. Litton would not have used or continued to use Defendant's Product.
20 Alternatively, if Defendant had adequately warned or instructed Thomas K. Litton, he would have
21 taken precautions when using Defendant's Product in order to eliminate or mitigate the risk of harm.

22 581. However, Defendant had no reasonable grounds to believe that its Product was safe
23 given the internal and external research on addiction and given the global recognition of video game
24 addiction. Defendant knowingly made false statements about the safety of its Product.

25 582. As a direct and proximate result of Defendant's material omissions, Plaintiff Thomas
26 K. Litton had no reason to believe that Defendant's Product was unsafe for children to use.

27 583. Plaintiff Thomas K. Litton reasonably relied on Defendant's misrepresentations that
28 its Product was safe for use.

584. A reasonable person, including Plaintiff Thomas K. Litton, would find information that impacted the users' health, safety, and well-being – such as the serious adverse health risks associated with the use of Defendant's Product – to be important when deciding whether to purchase, download, use, or to continue to use, that Product. Thus, Plaintiff Thomas K. Litton justifiably relied on Defendant's misrepresentations that the Product was safe when purchasing, using, and/or continuing to use Defendant's Product.

585. As a direct and proximate result of Defendant's material misrepresentations and false statements, Plaintiff Thomas K. Litton suffered significant injury, harm, damages, and economic loss, and will continue to suffer such harm, damages, and economic loss in the future. Thomas K. Litton's injuries are permanent and will require more medical care and treatment in the future.

586. Defendant's actions and omissions as alleged in this Complaint were intentional, oppressive, malicious, reckless, wanton, fraudulent, beyond all standards of decency, and without regard for human life or Plaintiff Thomas K. Litton's rights, thereby warranting the imposition of punitive damages. Thus, Plaintiff seeks actual and punitive damages according to proof.

COUNT XX – VIOLATION OF CALIFORNIA'S UNFAIR COMPETITION LAW

(Cal. Bus. & Prof. Code §§ 17200 *et seq.*)

(Against Defendant Microsoft in its capacity as the manufacturer of the Xbox Platform)

587. Plaintiff Thomas K. Litton realleges and incorporates by reference all the foregoing allegations of every paragraph of this Complaint as if repeated in full here.

588. Defendant is a corporation, and thus is a "person," as defined by California Business & Professions Code § 17201.

589. California's Unfair Competition Law ("UCL"), Business and Professions Code § 17200, *et seq.*, prohibits any "unlawful, unfair or fraudulent business act or practice" and any "unfair, deceptive, untrue or misleading advertising."

590. By the conduct described in detail above and incorporated herein, Defendant engaged in unfair and deceptive acts in violation of California's Unfair Competition Law.

1 591. Defendant knowingly engaged in the production, design, distribution, and sale of the
2 Product to users, including Thomas K. Litton, which was unsafe and addictive, particularly for
3 minors.

4 592. Defendant promoted its Product to users, especially minor users, while concealing
5 harmful information about the addictive and unsafe nature of said Product.

6 593. These business practices that Defendant has engaged in are fraudulent and deceptive
7 practices in violation of the UCL.

8 594. Defendant's business practices are also unfair in violation of the UCL. Defendant's
9 actions are unethical at minimum, and the benefit of employing its deceptive and addictive features
10 does not, in any circumstance, outweigh the harm that Plaintiff Thomas K. Litton suffered.

11 595. As a direct and proximate result of the foregoing acts and practices, Defendant has
12 received, or will receive, income, profits, and other benefits, which it would not have received if it
13 had not engaged in the violations of the UCL described herein.

14 596. As a direct and proximate result of Defendant's conduct, Plaintiff Thomas K. Litton
15 sustained economic losses, including hundreds of dollars per year in video game related spending.
16 Had Defendant not engaged in these fraudulent and deceptive practices, Plaintiff would not have
17 sustained the aforementioned economic injuries.

18 597. As a result of Defendant's conduct, Plaintiff Thomas K. Litton sustained significant
19 injuries.

20 598. As such, in accordance with the provisions of the California Business and Professions
21 Code §§ 17200 and 17203, Plaintiff requests that this Court enjoin Defendant from continuing to
22 violate the UCL or violating it in the same fashion in the future, and from continuing to conduct
23 business via the unfair and fraudulent business acts as set forth in this Complaint.

PRAYER

WHEREFORE, Plaintiff prays for judgment against each Defendant as to each relevant cause of action as follows:

1. For Plaintiff Thomas K. Litton's general damages, including pain and suffering and emotional distress, according to proof at the time of trial;

2. For Plaintiff Thomas K. Litton's past and future economic and special damages according to proof at the time of trial;

3. For Plaintiff Thomas K. Litton's medical and related expenses according to proof at the time of trial;

4. For Plaintiff Thomas K. Litton's prejudgment interest according to proof, pursuant to California Civil Code § 3291 at the time of trial;

5. For Plaintiff Thomas K. Litton's costs of suit herein;

6. For Injunctive relief;

7. For Attorneys' fees;

8. For exemplary and/or punitive damages according to proof at the time of trial; and,

9. For such other and further relief, whether at law or in equity, that this Court deems just and proper.
